

PRODUCT DATASHEET

Type: ICEL-8
Art. Nr.: 36048

9120015722832

Short description

Heating loop with thermostat for metal pipes, 8m, 125W, 24V

Product Description

The ICESTOP LIGHT protects pipes from ice and subsequently from damage. The ICEL is a ready-to-connect heating cable with thermostat and a constant output of approx. 17 W/m for a voltage of 24 V. The encapsulated thermostat is 100 % moisture-proof and switches the frost protection on if the temperature falls below 3 °C and off again if the temperature rises above 9 °C. Only suitable for metal pipes. Protection class: IP X7, CE compliant, min. installation temperature: - 15 °C, min. bending radius: 5 d, diameter: 7 mm, connection cable: 2x1.0 mm².

ETIM characteristics

Cable type	Dual core	Nominal voltage	24 Volt
Constant power	✓	Max. hold temperature	105 Degrees celsius
Self-limiting	✗	Heating capacity	17 Watt per metre
Screening	None	Diameter	7 Millimetre
Material screening	Other	Height	0 Millimetre
Surface treatment screening	Other	Width	0 Millimetre
Colour	Black	Length	8 Metre
Application	Pipe heating
