

PRODUCT DATASHEET

Type: Thermokit-FPT
Art. Nr.: 38892

9120054178195

Short description

Plug cord with thermostat, 2m, for pipe trace heating

Product Description

The Thermokit for pipe trace heating (frost protection) is a plug connection cable in which a thermostat is integrated. Either a heating tape or a heating cable can be connected to this. The thermostat is 100 % moisture-protected and switches the frost protection on if there is a danger below °C and off again if the temperature rises above °C. The plug connection cable is 2 m long. A 50 cm long PTC thermistor is attached after the thermostat, to which the heating tape or heating cable is connected. Includes shrink sleeve set for the connection and termination of heating tapes and heating cables.

ETIM characteristics

Model	Heating cable/connection cable
Connection type	Heat shrinking technique
Scope of delivery	Equipped with closing
