Type: Thermokit-GPTD
Art. Nr.: 38893

9120054178201

Short description

Plug cord with double thermostat, 3m, gutter heating

Product Description

The Thermokit for gutter heating is a plug connection cable with an integrated double thermostat. Either a heating tape or a heating cable can be connected to this. The thermostat is 100 % moisture-proof and is switched on in the range between -5 °C and +3 °C. It is switched off again below -5 °C and above +3 °C. The plug connection cable is 3 m long and UV-resistant. A 50 cm long PTC thermistor is attached after the thermostat, to which the heating tape or heating cable is connected. Includes shrink sleeve set for the connection and termination of heating tapes and heating cables.

ETIM characteristics

Model	Heating cable/connection cable
Connection type	Heat shrinking technique
Scope of delivery	Equipped with closing
