

PRODUCT DATASHEET

Type: ICE-01
Art. Nr.: 40570

Short description

Heating loop with thermostat for metal pipes, 1m, 10W, 230V

Product Description

The ICESTOP heating loop protects pipes from ice and subsequently from damage. The ICESTOP is a plug-in heating cable with a constant output of approx. 10 W/m. The encapsulated thermostat is 100 % moisture-proof and switches the frost protection on at temperatures below 3 °C and off again from 9 °C. Only suitable for metal pipes. Protection class: IP X7, test mark: FIMKO, CE compliant, min. installation temperature: - 15 °C, dimensions: 5.5 x 8.5 mm, min. bending radius: 3 d, plug connection cable: 2 m, 230 V.

ETIM characteristics

Cable type	Dual core	Nominal voltage	230 Volt
Constant power	✓	Max. hold temperature	90 Degrees celsius
Self-limiting	✗	Heating capacity	10 Watt per metre
Screening	Braiding	Diameter	8.5 Millimetre
Material screening	Other	Height	8.5 Millimetre
Surface treatment screening	Other	Width	5.5 Millimetre
Colour	Blue	Length	1 Metre
Application	Pipe heating
