

PRODUCT DATASHEET

Type: ICE-20
Art. Nr.: 40580

Short description

Heating loop with thermostat for metal pipes, 20m, 200W, 230V

Product Description

The ICESTOP heating loop protects pipes from ice and subsequently from damage. The ICESTOP is a plug-in heating cable with a constant output of approx. 10 W/m. The encapsulated thermostat is 100 % moisture-proof and switches the frost protection on at temperatures below 3 °C and off again from 9 °C. Only suitable for metal pipes. Protection class: IP X7, test mark: FIMKO, CE compliant, min. installation temperature: - 15 °C, dimensions: 5.5 x 8.5 mm, min. bending radius: 3 d, plug connection cable: 2 m, 230 V.

ETIM characteristics

Cable type	Dual core	Nominal voltage	230 Volt
Constant power	✓	Max. hold temperature	90 Degrees celsius
Self-limiting	✗	Heating capacity	10 Watt per metre
Screening	Braiding	Diameter	8.5 Millimetre
Material screening	Other	Height	8.5 Millimetre
Surface treatment screening	Other	Width	5.5 Millimetre
Colour	Blue	Length	20 Metre
Application	Pipe heating
