Product Description

The LAVA STAND is a mobile infrared heater that can be used as an additional heat source or as an independent heating system in almost any room, such as living rooms, offices, bathrooms or containers, thanks to its integrated stand. The infrared heater is ready for use at any time and can be easily controlled on the device thanks to the integrated control. Thanks to the homogeneous surface temperature, heat is emitted evenly at the location where it is placed - without the need for time-consuming installation work. A mounting kit for installing the panel on the wall is available as an option. The infrared panel itself is only 22 mm thick and blends into any room thanks to its simple, white design. Available in the color traffic white RAL 9016; output: 300W or 400W; finely textured surface, protection class: IP 21, surface temperature: max. 95 °C, plug cable: 1 m, 3 x 1.5 mm²; including integrated LAVA-R control unit; 230V, system design: CE-compliant

ETIM characteristics

Type of IR radiation	IR-C	Power consumption	450 Watt
Mounting method	Freestanding	Supply voltage	230 230 Volt
Mounting direction	Horizontal	Frequency supply voltage	50 50 Hertz
Suitable for ceiling mounting	✗	Max. surface temperature	95 Degrees celsius
Degree of protection (IP)	IP21	Height	620 Millimetre
Colour	White	Width	900 Millimetre
With imprint	✗	Depth	22 Millimetre
With room temperature controller	✓	RAL-number	9016
With mounting material	✓	Colour temperature	0 0 Kelvin
With framework	✗		
Material framework	Other		
Colour framework	White		
Surface treatment	Other		
Surface structure front-side panel	Smooth		
With lighting cove	✗		
Dimmable	✗		
Light outlet	Direct
