

## PRODUCT DATASHEET

**Type:** ET-HP-FIRE+ICE2-5-W

Art. Nr.: 48001

9120129932097

#### **Short description**

Air-to-air heat pump, monobloc, white, 3.05kW, 230V

#### **Product Description**

The innovative FIRE+ICE domestic heat pump with air conditioning function impresses with its purist design, multifunctional use and individual control options. As a heat pump, it primarily impresses as an efficient heating system with a COP of 3.28 and a heat output of 3.05 kW. However, it can also be operated as an air conditioning unit in the warmer months, allowing it to be used all year round. Depending on requirements, the heater can be controlled via the touch display, the remote control or the external room thermostat (available separately). The air-to-air heat pump is ideally suited as a decentralized heating solution for rooms up to  $35 \text{ m}^2$  in the renovation of apartments and serves as a replacement for gas and oil heating systems as well as night storage heaters. Thanks to the monobloc design, the heat pump can be installed in rooms with an external wall and does not require an external unit on the façade or on the property. Only two 200 mm core drill holes and one 20 mm hole to the outside are required for installation. The simple installation does not require a refrigerant technician. The heat pump is connected directly to a socket. In night mode, the appliance runs particularly quietly at 27db(A). The heat pump works with R32 refrigerant. The scope of delivery includes all the necessary parts for installation including drilling template, insulated wall duct with 100cm length, sealing tapes, stainless steel air hole covers and mounting rail as well as the remote control incl. battery. The condensate hose is included in a heated version. Power supply: 230V; incl. 1.7m plug cable; heating output 3.05 kW at  $+7^{\circ}$ C outside temperature; additional 1.8 kW auxiliary heating element, which can be set to half or full output; maximum connection cable: 2.89 kW; fuse protection: 16 AC; COP: 3.28 at  $+7^{\circ}$ C outside temperature; appliance dimensions:  $1010 \times 549 \times 165$  mm, weight: 41kg, color: white, 230V.

Number of fan levels

### **ETIM** characteristics

Model

Model	vvali (10vv)	Nulliber of fall levels	3
Operating principle	Cooling and heating	Max. air volume	400 Cubic metre per hour
Operation	Remote control	Temperature setting range	16 31 Degrees celsius
Timer	✓	<b>Dehumidification capacity</b>	1.1 Litre per hour
Type of refrigerant	R32	Refrigerant pre-charge	0.5 Kilogram
Energy efficiency class cooling	A+	Global warming potential (GWP)	675
Energy efficiency class heating	Α	Connection voltage (system)	230 Volt
With filter	✓	Cooling capacity	3.1 3.1 Kilowatt
		Heating capacity	3.05 3.0 Kilowatt
			5
		Power rating	2890 Watt
		Annual cooling energy consumption (350 hours - full load)	252 Kilowatt hour
		Height	549 Millimetre
		Width	1010 Millimetre
		Depth	165 Millimetre
		Sound pressure level (cooling)	41 41 Decibel A weighted
		Sound pressure level (heating)	41 41 Decibel A weighted
