Who we are?

TEP Ex

OUR MISSION IS

to be a fast and flexible partner and be closer to our clients in every world region.

Longstanding experience, reliable supply chain, and highest technology process models enable us to produce high quality Ex products

**A 70-year
legacy of
Ex products**

Make your work surroundings safer

TEP Ex New factory

We have built a new factory with a total of 3000 sqm of space. Machine processing, assembly, and office spaces. The company employs approximately 40 employees.

TEP History

TEP was a company founded in 1948 and operated until the late 90s.

TEP Ex Future

Currently, the company employs over 70 employees. In the meantime, a new hall has been built for logistics purposes (finished product warehouse), and there are plans to construct another production facility (all in the same location).

TEP Ex The founding

In 2002, a private independent company, **TEPEX d.o.o.**, was established, and it continued with the production and development of new and modern Ex products.

A light blue map of Europe is positioned in the background of the 'MADE IN EUROPE' text. The map shows the outlines of the European continent and its major countries.

MADE IN EUROPE

- **Own production facilities more than 3000 m²**
- **70 employees**
- **16 engineers**

From concept to the finished product we develop everything in-house to ensure maximum quality and efficiency. It enables us to move much faster because we don't rely on any externalities.

Full control over our production allows us to ensure that we deliver only the best and most reliable devices.

ATEX certification

TEP Ex

ATEX certification is given to equipment that has gone through **rigorous testing** outlined by European Union directives. Products that are ATEX compliant have been proved **safe** to use **in specific environments** with explosive atmospheres, according to the zone/s they are certified to be used in.

- **40+ ATEX type certificates**
- **50+ ATEX component certificates**
