

Huawei Technologies Deutschland GmbH, Hansaallee 205, 40549 Düsseldorf

Nuremberg, 2019.10.08

To whom it may concern

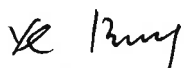

UN3091 – dangerous goods declaration

- Each HUAWEI inverter has a non-rechargeable lithium button battery installed (Manufacturer Part No: BR2032 from Panasonic, link to its specification: <https://industrial.panasonic.com/cdbs/www-data/pdf2/AAA4000/AAA4000C222.pdf>)
- This cell contains 0.06 g lithium. Please see all relevant data sheet: <https://industrial.panasonic.com/ww/products/batteries/primary-batteries/lithium-batteries/coin-type-lithium-batteries-br-series/BR2032>
- In accordance with IATA 2019 Lithium Battery Guide, our classification is UN 3091 (Lithium Metal Batteries Included in Appliances)
- As the cell contains less than 1 g of Li and each inverter package contains only button-cell batteries installed in equipment (including printed circuit boards), the package and documentation is considered to be approved by IATA for each aircraft.

Attachment is an identification and classification report for air transportation of goods to our inverter. We have this report respectively for each model of the inverter.

On behalf of Huawei Technologies

Yours Faithfully,

Liang Ye 
Director of Solar Inverter Solution Sales & Marketing, Europe
