Cable assembly WINSTA® MINI with strain relief

The WINSTA® MINI cable assembly rated current 10 A supports fast, reliable installation. Whether on PCBs, in control cabinets or for connecting lights – pluggable installation connectors from WAGO allow you to establish connections according to an enormous variety of requirements in seconds. For greater security in electrical installations, the pluggable installation connector is equipped with mechanical protection against mismating. The WINSTA® MINI pluggable installation connector with A coding in black or white is normally used for general mains applications in power distribution. Due to its particularly minimal dimensions, our WINSTA® MINI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology is very suitable in very tight spaces, i.e., for connections when very little room is available. This product meets all the mandatory safety requirements of fire class E; as a result it can be used in areas where fire safety is relevant. Not using halogen additives in the production of this cable assembly noticeably improves fire safety and minimises environmental pollution.

Fast, secure pluggable connections - cable assemblies from WAGO

A socket and a plug are provided. WINSTA® is the pluggable connection system that is optimally tailored to the strict requirements of electrical installation. It allows fast, secure and, above all, error-free installation of components and cables. Now you can also reduce installation costs without compromising safety and quality: with strain relief hosting eliminates the need for servicing and prevents unnecessary downtime.

- · effective protection against mismating
- compact design for conductors with a cross-section up to 1.5 mm<sup>2</sup>
- · for any mains application
- · ready for immediate use
- quick replacement of defective units during ongoing operation
