PCB terminal block, 805 Series, push-button

Quick and easy connections are guaranteed with this PCB terminal block (item number 805-102). It offers the flexibility needed for different mounting types. Rated current and voltage are key factors to consider when selecting a PCB terminal block, as they determine the product's suitability for different applications. This product has a rated voltage of 320 V and a rated current of 17.5 A, making it suitable for high-load applications. Strip lengths must be between 9 mm and 10 mm when connecting conductors to this PCB terminal block. Featuring one conductor terminal along with Push-in CAGE CLAMP®, this product outperforms the competition. Push-in CAGE CLAMP® technology provides a universal connection solution for any type of conductor. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. Dimensions: 8.5 x 13.7 x 13.6 mm (width x height x depth). This PCB terminal block is suitable for conductor cross sections ranging from 0.2 mm² to 1.5 mm². It has one level. You can connect two potentials / two poles using the two clamping points. The clamping spring is made of chrome-nickel spring steel (CrNi), the gray housing is made of polyamide (PA66) for insulation, and the contacts are made of electrolytic copper (ECu). Tin is used for coating the contact surfaces. A push-button is used to operate this PCB terminal block. The PCB terminal block is designed for THT soldering. Insert the conductor at a 0° angle. The solder pins measure 0.5 x 0.75 mm in cross-section and 3.2 mm in length and are arranged over the entire terminal strip (staggered). There are one solder pin per potential.

Installation Notes

Conductor termination

Inserting solid conductor via push-in termination.
Inserting and removing fine-stranded conductors via push-buttons.

Installation

Terminal strips with spacers and enlarged conductor entry (5 mm pin spacing) are available upon request.

Commoning

WAGO's 805 Series Terminal Strips provide "internal commoning" to meet requirements than ban routing the ground conductor over the board. This enables custom terminal strips to be commoned and marked at the factory upon request.

Installation

Mixed-color terminal strips are available upon request.
