Dimensions in mm

Cable assembly WINSTA® MINI with protection type IP20

For signal and power transmission: The *WINSTA*® MINI cable assembly with protection against mismating. WAGO pluggable installation connectors can be used when requirements repeat or are planned on a specified grid, for example for installing grid lighting or flush-mount lighting. The coding options reduce installation errors, allowing fast, maintenance-free wiring of all components. *WINSTA*® MINI pluggable installation connectors with I coding in blue are especially suitable for easy lighting installation, for example for the dimming of DALI lights. Thanks to its particularly minimal dimensions, our *WINSTA*® MINI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology is very suitable in very restricted spaces, i.e., for installations when very little room is available. If you need to satisfy stricter safety standards, you should use cables with fire class C. These are suitable for use in buildings with particularly high demands on safety. The cable assembly is free of halogen. This eliminates the addition of environmental pollutants during production. It also achieves a higher fire class, since halogen-free materials do not easily ignite.

Pluggable connections instead of screw connections – cable assemblies from WAGO

A socket and a plug are provided. The WINSTA® Pluggable Connection System allows pluggable electrical installation. This significantly reduces the need for servicing and lowers costs. Choose durability and quality – with strain relief hosting from WAGO makes the installation of electrical components substantially easier.

- protection against mismating eliminates errors
- easy tool-free operation, a wide range of coding options
- with I coding for use in the automation of buildings (lighting control)
- ready to install and use immediately
- rapid, structured electrical installation

| Variable coding                         | No  |
| Marking                                 | +-  |
| Potential marking                       | +-  |
| Mating force of a plug-in connection    | approx. 20 70 N (depending on pole number)                |
| Retention force of a plug-in connection | when locked: > 80N  |
| Unmating force of a plug-in connection  | when unlocked: approx. 20 70 N (depending on pole number) |
| Number of mating cycles                 | 200, without resistive load                               |
| Connection type                         | Socket - Plug   |
| Type of pre-assembled cable             | Interconnecting cable                                     |
| Cable type                              | H05Z1Z1-F 2x1.5   |
| Protection type                         | IP20; IP40 when mated                                     |

| Plug-in connection            |   |
|-------------------------------|---|
| Mismating protection          | Yes   |
| Note on mismating protection  | All WINSTA® components are 100% protected against mismating when: a.) plugging different numbers of poles b.) plugging while rotated 180 c.) plugging while laterally staggered d.) plugging one pole   |
| Locking lever                 | Can be retrofitted  |
| Locking of plug-in connection | Locking lever   |
| Note on locking system        | All connectors for mounted installations (snap-in versions for lighting fixtures or devi-<br>ces, all types of PCB and distribution connectors) are factory-equipped with locking le-<br>vers to ensure plugs and sockets are securely locked. Additional locking levers are only<br>required for flying leads (plug/socket). |
