

REACH - Regulation (EU) No 1907/2006

REACH is an EU regulation concerning chemicals substances, their control and safe use.

It encompasses the registration, evaluation, authorisation and restriction of chemical substances. (REACH is an acronym for: Registration, Evaluation, Authorisation and Restriction of Chemicals).

REACH has replaced several EU regulations on chemical substances, used either on their own or as components in preparations. REACH also complements other environmental and safety regulations.

The central objective of REACH is the protection of both human health and the environment from risks that can arise from the use of chemical substances, either on their own or as a component part of a mixture or item.

These restrictions form part of a framework that Finder has followed for some time.

As a **downstream (final)** user of chemical substances, Finder proactively liaises with suppliers, continuously monitoring the safety data information for each substance or preparation. It is emphasised that Finder does not modify the chemical characteristics of the substances and/or preparations used in its production processes.

Within the timeline provided by the Directive, Finder is committed to select its suppliers with care and to ensure good communication with its customers; particularly with respect to updated List of Substances as published by ECHA – The European Chemicals Agency. The following pages show the latest update of the 'Candidate list of substances of very high concern for authorization (SVHC)', and an extract from the list of substances - REACH regulations Annex XVII.

Finder policy is further strengthened through its ISO 14001 Quality and Environmental Management System, which fully assesses all its material and chemical suppliers prior to use. And, as a **downstream users** of chemical substances, preventive measures addressing the consequential risks have been implemented as described, and further supported with the introduction of a company-wide Health and Safety Management System to ensure the protection of the staff involved in all the various production processes.

REACH – Candidate List of Substances of Very High Concern – SVHC

FINDER declares that none of its products contain any of the substances listed in this table of SVHC in concentrations exceeding 0.1% of total product weight.
