HEAT-SHRINK UNDER INSULATION IN-LINE SPLICE KIT

These splice kits are designed for the in-line joining of nVent RAYCHEM selfregulating heating cables.

The kit nVent RAYCHEM S-19 is designed for use with BTV heating cables, the S-21 for QTVR and the S-69 is for use with XTV and KTV heating cables.

All kits are approved for use in hazardous areas.

The splice kits employ easy to use heat-shrinkable tubing with an adhesive, that when heated forms a semi-flexible moisture proof encapsulation.

Electrical continuation is maintained via crimps for the conductors and a solder connection for the braid of the heating cable.

Due to its low profile design the finished splice can be installed under the insulation, directly on the pipe.
