

E-06, E-19 AND E-50

HEAT-SHRINK UNDER INSULATION END SEAL KITS

These end seal kits are designed for the termination of nVent RAYCHEM'S industrial heating cables.

The nVent RAYCHEM E-06 is designed for use with BTV- and QTVR heating cables, the nVent RAYCHEM E-19 is designed for use with XTV- and KTV heating cables, and the nVent RAYCHEM E-50 is for use with VPL heating cables. All kits are approved for use in hazardous areas.

The end seal kits E-06 and E-19 employ easy to use heat-shrinkable tubing with an adhesive, that when heated forms a semi-flexible moisture proof encapsulation. The end seal kit E-50 employs high temperature heat-shrinkable tubing with a plastic melt liner that when heated forms a semi-flexible moisture proof encapsulation. Due to the low profile design the finished termination can be installed directly on the pipe.

One end seal kit is required for each termination.
