

DYNASPHERE AIR TERMINAL, MKIV

CATALOG NUMBER

D/SMKIVSS

The economic and safety implications of lightning can be devastating. In general, the highest point of a facility is the most vulnerable to a direct lightning strike. Lightning rods or air terminals are needed to capture the strike to a preferred point and to safely conduct the energy to ground to minimize the risk.

The nVent ERICO Dynasphere air terminal provides a preferred point for lightning discharges which would otherwise strike and damage an unprotected structure and/or its contents. The primary function of an air terminal, or air termination system, is to capture the lightning strike to a preferred point, so that the discharge current can be directed via the downconductor(s) to the grounding system.

CERTIFICATIONS

FEATURES

- Dynamic response to the approach of a lightning downleader
- Non-radioactive technology
- No external power required
- Three replaceable terminals for specific elevation requirements

PRODUCT ATTRIBUTES

- Article Number: 702085
- Material: Stainless Steel 316 (EN 1.4401)
- Temperature: -40 to 100 °C
- Effective Projected Area: 270.960 mm²
- Diameter: 25.6 cm
- Height: 22 cm
- Thread Size: 1/2" BSPP
