

**Product name**

KST110R

**Item number**

32334

**Manufacturer**

ETHERMA

**Product description**

Pew heater, connection right, 440W, 1.1m, 230V

KST pew heaters are dark infrared heaters and are used for local heating of churches. Due to special ventilation slots, the heat is almost exclusively released to the front. Especially suitable for churches, which are visited 1x per week. The electrical connection is made via device plugs and the factory-made through-wiring simplifies installation. The devices have an integrated overheating protection with automatic restart, an break-safe special heating element without a glowing heating coil, and an angle plug included. Protection rating: IP 21, RCD protection circuit, certification mark: ÖVE, CE marking, galvanized sheet steel, colour: RAL 8007 fawn brown, connection: right.

**Technical Details**

|                                         |                    |                                 |                 |
