

Product name

Thermokit-FPT

Item number

38892

Manufacturer

ETHERMA

Product description

Plug cord with thermostat, 2m, for pipe trace heating

The thermo-kit for pipe heating (frost protection) is a pluggable connection line in which a thermostat is incorporated. Either a heating tape or a heating cable can be connected to this. The thermostat is 100% moisture-resistant and it switches on the frost protection in the event of hazards below °C and off again from °C. The plug connection cable is 2 m long. Alongside the thermostat, a 50 cm long cold lead is attached, to which the heating tape or heating cable is connected. Including shrink sleeve set for the connection and end pipes of heating tapes and heating cables.

Technical Details

Model	Heating cable/connection cable
Connection type	Heat shrinking technique
Scope of delivery	Equipped with closing
