

Product name

Thermokit-GPTD

Item number

38893

Manufacturer

ETHERMA

Product description

Plug cord with double thermostat, 3m, gutter heating

The thermo-kit for gutter heating is a pluggable connection line, which incorporates a double thermostat. Either a heating tape or a heating cable can be connected to this. The thermostat is 100% moisture-resistant and turns on the frost protection between -15 °C and °C. It is switched off again below -15 °C and above °C. The plug connection cable is 3 m long and UV-resistant. Alongside the thermostat, a 50 cm long cold lead is attached, to which the heating tape or heating cable is connected. Including shrink sleeve set for the connection and end pipes of heating tapes and heating cables.

Technical Details

Model	Heating cable/connection cable
Connection type	Heat shrinking technique
Scope of delivery	Equipped with closing
