

Product name

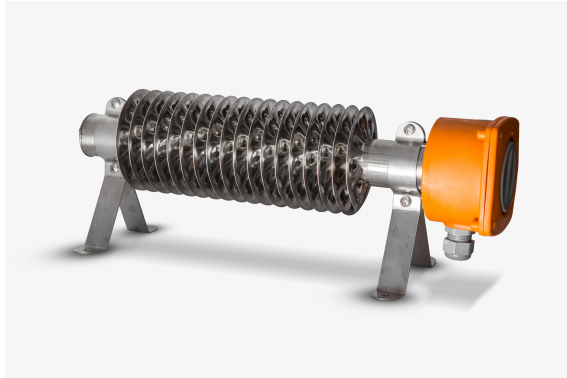

ET-RDA-250

Item number

40591

Manufacturer

ETHERMA

Product description

Finned tube heater with controls, 0.25kW, IP66/67, 230V

For heating damp rooms, such as greenhouses, protecting sensitive equipment from frost, heating in harsh operating environments, such as pumping stations, crane cabins, construction vehicles and foremen's offices in factory halls. Optimal heat dissipation due to large surface of the folding sections. The built-in heating element made of technical ceramics ensures good heat distribution. A robust radiator made of stainless steel, material: 1.4512, all parts are rustproof, all mounting points are dust- and waterproof, for wall and floor mounting. With easy control between 5-30 °C, surface temperature: max. 185 °C, CE marking, certification mark: KEMA-KEUR, protection rating: IP 66/67, connection: hard wiring or plug.

Technical Details

Automatic temperature controller	Yes	Power	250 Watt
Low surface temperature	No	Rib diameter	120 Millimetre
Universal connectable	Yes	Voltage	230 230 Volt
Degree of protection (IP)	IP66/IP67	Height	184 Millimetre
Explosion-proof	No	Width	120 Millimetre
For Ex-zone gas	None	Length	400 Millimetre
For Ex-Zone dust	None		
Temperature class according to directive 94/9/EC	None
