

Product name

LAVALITE-GL-240-PW

Item number

40903

Manufacturer

ETHERMA

Product description

Infrared heating panel thin, glass, pure white, 50x63cm, 240W, 230V

The extra thin LAVA LITE infrared heating panel is impressive with its efficiency. Despite the 6 mm thick safety glass, the infrared heating panel is only 33 mm deep, including the mounting rails, making it ideal for wall mounting - even where there is less space, such as in hallways or stairwells. The glass surface is a very good radiation emitter and ensures optimal heat radiation. Due to the frame-less design and extremely shallow depth, the infrared heating panel blends harmoniously with the room. The glass surface is available in pure white and mirror finish. Outputs: 240, 450, 700 and 900 W, mounting depth: 33 mm, surface temperature: approx. 95 °C, vertical and horizontal wall mounting possible, protection rating: IP X4, surfaces: 6 mm ESG safety glass, plug connection cable: 1 m, CE marking.

Technical Details

Type of IR radiation	IR-C	Power consumption	240 Watt
Mounting method	Surface mounting	Supply voltage	230 230 Volt
Mounting direction	Horizontal/vertical	Frequency supply voltage	50 50 Hertz
Ceiling mounting	No	Max. surface temperature	95 Degrees celsius
Degree of protection (IP)	IP55	Height	630 Millimetre
Colour	White	Width	500 Millimetre
With imprint	No	Depth	33 Millimetre
With room temperature controller	No	RAL-number	0
With mounting material	Yes	Colour temperature	0 0 Kelvin
With framework	No		
Material framework	Other		
Colour framework	Other		
Surface treatment	Other		
Surface structure front side panel	Smooth		
With lighting cove	No		
Dimmable	No		
Light outlet	Direct
