security information	
security information Siemens functions machine	s provides products and solutions with industrial security s that support the secure operation of plants, solutions, es, equipment and/or networks. They are important components stic industrial security concept. With this in mind, Siemens'

products and solutions undergo continuous development. Siemens recommends strongly that you regularly check for product updates. For the secure operation of Siemens products and solutions, it is necessary to take suitable preventive action(e.g. cell protection concept) and integrate each component into a holistic, state-of-the-art industrial security concept. Third-party products that may be in use should also be considered. For more information about industrial security, visit http://www.siemens.com/industrialsecurity. To stay informed about product updates as they occur, sign up for a product-specific newsletter. For more information, visit http://support.automation.siemens.com. (V/3 4)
