# MAGO

Cable assembly WINSTA® RD rated current 16 A

The WINSTA® RD cable assembly rated current 16 A allows installation of solid and fine-stranded conductors. For greater security in electrical installations, the pluggable installation connector is provided with mechanical protection against mismating. The pluggable installation connector offers touch-proof protection with live components in accordance with protection type IP20 (When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)). The WINSTA® RD features a round design that is very good for use in conduits with an inner diameter of 20 mm, for example in the prefabricated house sector. According to the European CPR, the fire class of the cables used for construction is essential for building safety as well. For houses with average safety requirements, cable assemblies with fire class E are suitable.

Fast, error-free assembly thanks to cable assemblies from WAGO

The cable is pre-assembled with a plug and a free end. The WINSTA® Pluggable Connection System is ideally tailored to the very strict requirements of building installation. It makes electrical installation pluggable, and consequently faster, more reliable, and error-free. Using this pre-assembled system decreases time spent on assembly and errors during installation at the construction site. Choose quality and durability – with fire class E from WAGO makes the installation of electrical components noticeably easier.

- pluggable installation connectors with protection against mismating
- · saves time, since no wiring is required at the construction site
- with S coding for AC applications of distributed components
- flexible installation to save space
- · fast, secure installation

| Notes |   |
|-------|---|
| Note  | Cables with a different fire class can be found in the eShop. |
