Female connector/socket WINSTA® MIDI with protection against mismating

WAGO offers various connection technology solutions for connecting devices, for example, the WINSTA® MIDI female connector/socket. The pluggable PCB connectors with spring pressure connection technology and Push-in CAGE CLAMP® technology from WAGO allow maintenance free terminal connections. The coding options reduce installation errors, allowing fast, maintenance-free wiring of all components. The WINSTA® MIDI pcb connector with A coding in black or white is usually used for general mains applications in power distribution. This pcb connector can be used for electrical currents up to 25 A. Thus the product is especially suitable for high power loads. The WINSTA® MIDI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology facilitates exemplary electrification. Due to the included test slot, connections can be checked even when they are plugged in. This saves time, labor, and money.

Lower costs through fast commissioning and elimination of service expenses – solutions from WINSTA® MIDI

The WINSTA® Pluggable Connection System is ideally tailored to the strict requirements of building installation. It makes electrical installation pluggable, and consequently faster, more reliable, and error-free. Use of this pre-assembled system reduces time spent on assembly and installation errors at the construction site. Take advantage of the pluggable version of our maintenance-free spring pressure connection technology too! Plan your installation with WINSTA® MIDI pcb connectors with protection against mismating from WAGO.

- pcb connector with protection against mismating
- for automation controllers
- with A coding for use in many general mains applications
- quick replacement of defective units during ongoing operation
