Coding finger (red circle)

- Universal connection for all conductor types
- Unique, compact, double-row connector system for conductor cross-sections up to 1.5 mm²
- High-density, wire-to-board connections in very confined spaces
- Centered strain relief plate anchors conductors, while acting as convenient connection and disconnection handle. It also provides easy access to operating slots – even when wired.
- Coding fingers provide 100% protection against mismatching

Notes

Safety information

The MCS – MULTI CONNECTION SYSTEM includes connectors without breaking capacity in accordance with DIN EN 61984. When used as intended, these connectors must not be connected/disconnected when live or under load. When used as intended, these connectors must not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

Installation Notes

Conductor termination

Inserting a conductor via (2.5 x 0.4) mm screwdriver.

Locking system

Lever as a lock – when closed, female connector is locked.

Lever as a disconnection aid – when opened, female connector is disconnected. Rotating the lever lifts the female connector out of the male header.

Screw interlock can only be disconnected using a tool.

Coding

Coding a female connector by removing coding finger(s).

Strain relief

Strain relief plate for field assembly

Centered strain relief plate anchors conductors for easy disconnection.
