2 RJ45 connections UTP Cat. 6A, flat model, incl. base 71 x 71 mm with screw fixing
170-75272

This mechanism with 2 RJ45 connection points UTP Cat. 6A, flat model, is used to make a network connection with 2 devices for telephone, Ethernet, IP or internet applications. Each of the connection points on the mechanism is connected in a star configuration to the central connection cabinet using a cable of the same performance type. The base has internal dimensions of 45 x 45 mm and external dimensions of 71 x 71 mm and is equipped with screw fixing. A finishing set in the colour of your choice must be ordered separately.

– simple and quick assembly of one or more mechanisms by the indication (chalk line, laser, etc.) of the centre of the flush-mounting frame
– vertical coupling centre-to-centre distance 60 mm by sliding several bases into each other, they lock themselves automatically
– vertical coupling centre-to-centre distance 71 mm using pre-formed lips at the bottom, by folding the lips downwards over a length of 1 mm, the bases support each other and the centre-to-centre distance is guaranteed.
– horizontal connection of multiple bases is quick and perfect thanks to the folded-up dovetails on the left and right sides
– extra robustness due to the folded-up edges on the outside of the base and the continuation into the inside of the base

Technical data

2 RJ45 connections UTP Cat. 6A, flat model, incl. base 71 x 71 mm with screw fixing.

• Protection degree: IP41 for the combination of a mechanism, central plate and faceplate
• The combination of a mechanism, a central plate and a faceplate has an impact-resistance of IK06
• Marking: CE

Universal base for 45 x 45 mm functions.

• Protection degree: IP41 for the combination of a mechanism, central plate and faceplate
• Impact resistance: The combination of a mechanism, a central plate and a faceplate has an impact-resistance of IK06
• Flush-mounting frame
    – 1 mm-thick metal
    – galvanized on all sides after cutting, even on the cut edges
    – with 4 grooves with screw hole of 7 mm
    – with 4 screw holes (indicated by a screw symbol) with a diameter of 3 mm for mounting on panels
• Fixing method
    – with screws for simple fixing in a flush-mounting box with grip surfaces

niko

- Centre-to-centre distance
  – horizontal coupling and vertical coupling with centre-to-centre distance 71 mm
  – horizontal connection of several bases is quick and perfect thanks to the folded-up dovetails on the left and right side
  – extra robustness due to the folded-up edges on the outside of the base and the continuation to the inside of the base
- End border: The flush-mounting frame is equipped, both on the top and the bottom, with a dark grey, plastic end border. This border is made of PC+ASA and is joined to the flush-mounting frame using a melting process. The corners of the two end borders are equipped with rectangular openings (7.9 x 1.5 mm) each containing a multi-positional snap hook. Thanks to the snap hooks, the 4 rectangular openings ensure that the faceplate can always be attached flat to the wall, even in cases of untidy plasterwork. This works in two directions: If the flush-mounting box sticks out of the plasterwork, the multi-positional snap hooks can compensate for a 1 to 1.2 mm margin; if the flush-mounting box is sunk too deeply in the plasterwork, the snap hooks can compensate for up to a 1.8 mm margin. The end borders also have 4 round openings that ensure the correct positioning of the faceplate in relation to the central plate.
- Ambient temperature: -5 – +40 °C
- Marking: CE

Adaptor 9.1, single, flat for RJ connectors 650-450xx
- Dimensions (HxWxD): 20.7 x 44.8 x 20.1 mm
- Impact resistance: The combination of a mechanism, a central plate and a faceplate has an impact-resistance of IK06
- Marking: CE

Unshielded RJ45 connector UTP cat. 6A, for bandwidths up to 500MHz
- dimensions: H 20 x W 95 x D 42mm
- Impact resistance: The combination of a mechanism, a central plate and a faceplate has an impact-resistance of IK06
- Marking: CE
