

Video kit, 2-wire, with controller and external unit, for surface-mounting, 1 bell button

510-01001

4 year warranty

This video kit contains:

- External video unit, 2-wire, surface-mounted, 1 button
- Access control module, 2-wire, with integrated power supply

This compact external video unit is equipped with an HD colour camera, microphone and loudspeaker. The camera's infrared LEDs guarantee better visibility at night (razor-sharp black and white image). You can personalize the unit with a name plate (optionally in engravable PMMA plastic). The door lock can be connected to the access control module (recommended) or directly to the external video unit.

You can register your external video unit via the Niko access control app (Android or iOS) to enable control of the installation via your smartphone. Make sure your access control module is connected to your network router to receive calls in the app and software updates for your installation.

The kit can be expanded with:

- One external video unit 510-31001
- Up to 5 internal video units 510-50000
