

External video unit for Niko Home Control, with 2 illuminated touch buttons

550-22002

4 year warranty

This ultra-flat external video unit for flush mounting is finished with a black front plate made of anodised aluminium (3 mm thick). The device is equipped with a 130° HD colour camera and a Plexiglass name plate that can be engraved. The touch button requires no maintenance and is extremely durable. The external video unit is supplied with a flush-mounting box. This external unit has 2 illuminated touch buttons. This unique lighting concept (patent pending) provides refined and homogeneous illumination of the engraved nameplate, guaranteeing good visibility in the dark. Combined with touchscreen 2 (or a smartphone or tablet) as an internal video unit, access control can be integrated into a Niko Home Control installation via the external video unit. Please note: we recommend providing at least one touchscreen 2 on top of the smartphones and/or tablets, because a wired device is always more reliable than a mobile one.

Technical data

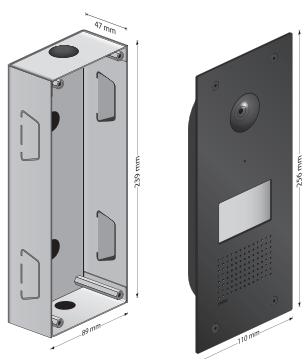

External video unit for Niko Home Control, with 2 illuminated touch buttons.

- Dimensions front plate: 256 x 110 x 3 mm (HxWxD)
- Dimensions flush-mounting box: 239 x 89 x 47 mm (HxWxD)
