Touch10, alu natural grey brushed

550-32103-221

4 ans de garantie

Touch10 is a sophisticated touchscreen with built-in keypad. It allows you to monitor and control the entire building from a central location: lighting, window coverings, access control, energy, HVAC, audio and more. With the three touch-sensitive keys, you can activate any action or routine with a single tap.

Touch10 has a slim 10” touchscreen and a keypad with premium metal finishings. It is an elegant addition to the interior design. It provides several options for a proactive but subtle interaction, based on radar detection. From a distance, it can display the high-level status to welcome you. When nearby, you get access to the detailed dashboard. Thanks to a built-in light sensor, the screen brightness adapts to the ambient light. You can easily switch between a light and dark theme.

This touchscreen is built with state-of-the-art technologies to deliver a secure and future-proof software solution. Security updates will also be provided for as long as this product is sold and for five years thereafter.

A touchscreen is considered the primary interface of modern building automation, providing a reliable wired connection to the entire installation. Smartphones and/or tablets can be used as secondary control options.

Données techniques

Touch10, alu natural grey brushed

.

- Compatible avec: connected controller,wireless smart hub
- Mise en service méthode 1: logiciel de programmation Niko Home Control
- Modification des réglages: sur l'appareil
- Taille de l’écran: 10.1"
- Résolution de l’écran: 1280 x 800
- Tension d'alimentation: 9 – 24 Vdc ou PoE
- Consommation électrique maximale: 12 W
- Température ambiante minimum: 0 °C
- Température ambiante maximum: 40 °C
- Température ambiante minimum pendant le stockage et le transport: 10 °C
- Température ambiante maximum pendant le stockage et le transport: 60 °C

- Degré de protection: IP20
- Dimensions (HxLxP): 159 mm x 240.4 mm x 37.4 mm
- Marquage: CE
