

Power distribution components

- MCB Distribution boards and enclosures
- MCCB Panelboards
- Switch and protection devices
- Industrial switch and fusegear

- Enclosed motor, heating and lighting control
- HRC cartridge fuses & fuse units

Smart solutions for electrical distribution in commercial and industrial applications

Powering Business Worldwide

We make what matters work.*

At Eaton, we believe that power is a fundamental part of just about everything people do. That's why we're dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because this is what really matters. And we're here to make sure it works.

Eaton's comprehensive range of power distribution solutions have been developed to meet today's challenging electrical sub-distribution applications in commercial and industrial buildings. Through a proven competency in electrical distribution, Eaton delivers an innovative approach to aid compliance with the wider regulatory requirements associated with modern buildings.

1.1	TYPE A, SPN 125A DISTRIBUTION BOARDS AND PAN ASSEMBLIES	5

Features & benefits

- Unique 'full form' blanking modules for unused MCB ways. Provides secure shrouding of unused busbar stabs for increased electrical safety. Blanking modules have interlinking form for improved positional security.
- Main busbar is removable for flexible installation.
- Fully shrouded Neutral busbar for increased safety.
- Choice of metering option to suit application needs and aid compliance with latest Building Regulation – part L2.
- Door opens 180° to provide easy access and device operation.
- Standard incomer Switch Disconnector rating of 125A provides higher rated solution for commercial buildings.
- Optional coupling kit available to electrically connect two distribution boards together vertically from a single supply cable to expand number of MCB ways.

General characteristics

Eaton's Memshield 3 MCB Distribution boards have evolved through an intimate knowledge and feedback from Electrical Contractors to provide solutions to a wide range of electrical distribution applications in commercial buildings. Memshield 3 delivers safe, reliable and high performance protection of electrical power distribution systems.

Type A Distribution boards are fully type tested with a conditional short circuit rating of 15kA to BS EN 61439. Associated devices are high performance MCBs, developed for Commercial and Industrial applications, dual rated at 10kA IEC – 60898 & 15kA IEC 60947-2 in B, C or D curves.

Type A SPN distribution boards

The SPN boards are rated at 125A as standard and available in 5 sizes with a choice of 4, 7, 10, 13 and 16 single pole outgoing ways. A choice of metering solutions are available as standard, providing clear electrical consumption information as well as a permanent capability of visualising information on a variety of other electrical parameters. The metering options have been developed to provide simple solutions to aid compliance with part L2 of the Building Regulations of England and Wales. A wide range of accessories including full profile blanking modules for unused MCB ways and door locking options, enhance electrical safety, whilst clean earth kits and vertical inter-connection kits to join two boards together, improves versatility of the range.

Type A SPN pan assemblies

The SPN pan assemblies offer a high degree of flexibility for custom applications and inclusion in other factory built assemblies. SPN types are rated at 125A and available with 4, 7, 10, 13, and 16 single pole outgoing ways.

Incoming devices

A range of incoming options are available, with the 125A SPSN switch disconnector being the most popular. In addition, there are a number of 100A RCCB options, which provide the added security of earth fault protection, covering 30mA–300mA applications. A direct connection terminal arrangement is also available for applications not requiring local isolation. Type A distribution boards can be stacked vertically to expand the number of outgoing ways using the vertical interconnection kit. For larger SP applications, requiring more outgoing ways – see our type B distribution boards with Single phase kit options.

Outgoing devices

For type A distribution boards, there is a choice of single pole MCBs plus RCBOs. MCBs are available in current ratings from 1A–63A, with trip types B, C and D, 10kA to IEC 60898 and 15kA to IEC 60947-2. RCBOs to IEC EN 61009 10kA are also available in a choice of trip sensitivity options from 10mA–100mA.

Features & benefits

- Welded 'case end' design board with removable gland plates provides super 'stiff' construction, even with gland plates removed. Construction virtually eliminates distortion during installation, ensuring final assembly fit and alignment.
- Unique cable trunking interface kit simplifies mounting of cable trunking and protects cables.
- Improved Neutral cable clamp design for simple & secure cable connection.
- Unique 'full form' blanking modules for unused MCB ways, provides secure shrouding of unused busbar stubs for increased safety. Blanking modules have interlinking form for improved positional security.
- Removable busbar assembly to assist installation.
- Additional Functional Earthing options and Clean Earth options available.
- Auto-formed, curved construction of main cover adds to board rigidity, with improved appearance.
- Removable door aids installation and 'easy hang' hinge design makes re-attachment of door simple.
- 125A Switch Disconnecter Incomer for general commercial building applications.
- 250A options on 18 and 24 way boards.
- Compact 250A options on 18 and 24 way boards, where used with cable trunking.

General characteristics

Eaton's Memshield 3 MCB distribution boards have evolved through an intimate knowledge and feedback from electrical contractors, consulting engineers and end users to provide solutions to a wide range of electrical distribution applications in commercial buildings. Memshield 3 delivers safe, reliable and high performance protection of electrical power distribution systems.

Type B distribution boards are fully type tested with a conditional short circuit rating of 25kA to BS EN 61439. Associated devices are high performance MCBs, developed for commercial and industrial applications, dual rated at 10kA IEC – 60898 & 15kA IEC 60947-2 in B, C or D curve.

A wide range of accessories including full profile blanking modules for unused MCB ways and door locking options, enhance electrical safety, whilst clean earth kits improve versatility of the range.

Where used with 250A sized incomers, an extension box or the provision of suitable sized cable trunking is required to accommodate incoming cabling. A new cable trunking interface kit is available to provide additional mechanical protection of incoming cables.

A choice of metering solutions are available as standard, providing clear electrical consumption information as well as a permanent capability of visualising information on a variety of other electrical parameters. The metering options have been developed to provide simple solutions to aid compliance with part L2 of the Building Regulations of England and Wales.

Type B TPN standard distribution boards

The optimised design for 125A TPN applications provides a choice of boards in sizes – 4, 6, 8, 12, 18 and 24 TP ways. 12, 18 & 24 TP way variants are also suitable for 250A applications, where the number of MCB ways could require a larger supply current rating. A choice of incomers are available to suit different applications including RCCB options and a single phasing kit to provide a large single phase board arrangement.

Incoming devices – 125A standard TPN board

The most popular choice will be the 125A switch disconnecter incomer option, but other choices include a 4-pole TPSN, 2P SPSN, a range of RCCB switches and a contactor controlled incomer with switch disconnecter for remote control of the supply to the board. A direct connection option is also available for applications that do not require local isolation.

Type B SPN pan assemblies

The TPN pan assemblies offer a high degree of flexibility for custom applications and inclusion in other factory built assemblies. 125A TPN types are available with 4, 6, 8, and 12 triple pole outgoing ways. 250A TPN types are available with 12, 18, and 24 triple pole outgoing ways.

125A AFDD type B TPN distribution board

- The optimised design for 125A TPN applications provides a choice of boards in sizes – 14, 24 and 36 AFDD ways and are fully type tested to BS EN 61439.
- Associated devices are high performance AFDDs to IEC/EN-62606, developed for commercial and industrial applications, trip rated at 10kA up to 25A and trip rated a 6kA for 32A and 40A.
- A wide range of accessories including optional internal SPD, multi board separation kits and alignment spacer, full profile blanking modules for unused AFDD ways and door locking options.
- A choice of metering solutions are available as standard including the multi meter pack.

High performance AFDDs to IEC/EN-62606

- trip rated at 10kA up to 25A
- trip rated a 6kA for 32A and 40A

2 x 80A EVG busbars which accommodates
incomer and AFDD feeders

125A incomer kits available as
standard (TP and TPSN)

Boards sizes combined to
align top and bottom

Same width (440mm) and depth (130mm)
as the Type B Distribution board

Optional internal SPD:

- type 1&2
- type 2

Type B, TPN 250A distribution board solutions

Type B TPN 250A High Load distribution boards

Removable gland plates are provided top/bottom for ease of installation

Removable front door to aid accessibility to devices

Covers fit within enclosure dimensions allowing adjacent mounting

Modern, curved edges enhance appearance of board

Choice of SP & TP 18mm dual rated MCBs 10/15kA to IEC 60898 and IEC 60947-2 from 1A–63A

Two TP 27mm MCB ways, rated up to 125A

Secondary cover, slides over two location screws at bottom of board for easier fastening

Type B TPN 250A High Load distribution boards

Developed to respond to the needs of modern commercial building applications, a new 250A TPN range of MCB boards delivers increased versatility by having the ability to supply and protect sub loads up to 125A. Based principally around standard 18mm MCBs and RCBOs, this range has provision for two TP 27mm MCBs, up to 125A.

Available in sizes 2, 6, 8, 12, 18 and 24 TP ways, of which two ways are dedicated to the 27mm MCBs. 27mm MCBs are available SP or TP with ratings from 20A–125A.

Incoming devices – 250A TPN board and 18/24 way 125A board

These incomer options can be used with the 250A board or with the 18 or 24 way variant of the 125A board to provide a greater choice of solutions at 250A.

The most popular choice will be the 250A TPN switch disconnector incomer option, but other choices include a 4-pole TPN switch disconnector, a choice of MCCB incomers from 160A to 250A and a contactor controlled incomer pack. There is also a direct connection option available for applications that do not require local isolation.

Outgoing devices

For type B distribution boards, there is a choice of single pole or triple pole MCBs plus SP and TP RCBOs. MCBs are available in current ratings from 1A–63A, with trip types B, C and D, 10kA to IEC 60898 and 15kA to IEC 60947-2. RCBOs to IEC 61009 10kA are also available in a choice of trip sensitivity options from 10mA–100mA. For the 250A “High Load” board, provision is given to accommodate a number of 27mm MCBs available in SP or TP sizes from 20A–125A to IEC 60947-2.

200A TPN type B distribution board, with integrated split meter for power/lighting

- TPN distribution board with 'smart' meter for power and lighting loads.
- Unique meter design calculates net values for each busbar section and total board load.
- Meter has both Pulsed and Modbus outputs as standard.
- Embedded vt technology and RJ 11 connections at meter minimises visible wiring.
- Supplied complete with factory fitted 200A Switch Disconnector incomer switch.
- Suitable for TPN and SPN applications as supplied (shorting link included).
- Increased earthing options supplied as standard.

The feature packed Eaton meter packs and boards

To meet the needs of part L2 of the Building Regulations introduced in England and Wales in 2006, Eaton's Memshield 3 meter packs provide simple integration with matched aesthetics. The EBMMPCT250 employs a multi-function, DIN rail mounted meter to measure electrical parameters on LV supplies to TPN distribution boards. It can also be used to meter single-phase loads. The unit is supplied complete with CTs and wiring terminals. This version is suitable for 100A–250A applications and as well as a pulsed output for kWh, the meter can be used to monitor other parameters, including line voltage and current. Electrical connection to the associated distribution board does not occupy any of the outgoing circuits. Modbus and MID certified meter versions are also available – see page 32.

The **EBMMPDC120** is supplied as a 120A direct connection solution, not requiring CTs. Cabling is simple and the meter provides a pulsed output for kWh. The meter is an MID certified unit, providing clear kWh information.

Double meter pack for two standard TPN distribution boards facilitate separate monitoring of "small power" and "lighting" from one main supply.

For single phase EAM boards, a 65A meter pack provides simple integration. (Amps, kW, kWh, kVar and kVarh pulsed output, MID compliant. See page 28 for single phase EAM boards with factory fitted meters, including split power and lighting boards.)

Metering solutions – type A metered boards

- Type A SPN boards with integrated meter.
- Split load versions utilise a two channel meter, feeding two independent busbars and groups of MCB/RBBOs.
- Split load versions provide independent monitoring of "Power" and "Lighting" loads and total load.
- Aids compliance with Part L2 of the Building Regulations (England & Wales).
- See page 129 for dimensions.

Metering solutions – type B meter pack assemblies

Eaton's Memshield 3 meter packs provide simple integration with matched aesthetics. Split metering for separate small power and lighting has been added to the range to meet the needs of the L2 Regulations introduced in England and Wales in 2006. The meters provide a pulsed output for kWh and display other useful parameters, including line voltage and current. Modbus versions are also available and provide remote access to additional electrical parameters. For details refer to page 32. For dimensions refer to page 129.

Energy Monitoring Solutions (EMS)

EMS solutions in standard and Memshield3 enclosures can electronically capture energy data from a number of meters in an installation. These need to be ordered as factory built assemblies.

Multi Meter Pack

- The Multi meter pack allows a 250A supply to be split between multiple EBM boards, but still be metered as a single or combined supply. This allows a single supply to be split and metered between power, lighting, mechanical services, etc. at different customer required currents. As many as 4 load cables per phase can be fitted which then pass through the CTs and on to their prospective EBM boards.
- Optional MCB Load Protection. Protective devices EM*S and EM*H can be added to protect the load circuits. The board can disperse a maximum current of 250A which can be split between a combination of load protecting MCBs.
- The double meter pack is set up with a single plug and play double input meter, 2 CTs and the voltage tap off fuse block, all pre-wired.
- The quad meter pack is setup as the double but with an extra CT and a quad input meter instead of the double input meter. (A further CT can be added if required).
- Optional internal SPD kit available.

Miniature circuit breakers (MCBs)

The Eaton range of 10kA/15kA high performance miniature circuit breakers (MCBs) have been designed to meet the latest UK, European and international standards, with ratings from 1A up to 63A.

The Eaton miniature circuit breakers are designed and tested in accordance with BS EN 60898 and are available in B, C and D characteristic curve as standard.

Technical characteristics

- Modular design, DIN rail mountable.
- 1, 2, 3, and 4-pole MCBs for commercial and Industrial applications.
- Rated breaking capacity 10kA to IEC 60898 and 15kA to IEC 60947-2.
- Rated currents from 1–63A in B, C and D characteristics.
- Positive contact indication.
- Box clamp barrier to prevent incorrect cable/busbar insertion.
- Calibrated at 40° C.
- Can be used with both pin and comb type busbars.
- Suitable for use in Eaton Memshield 3 distribution boards and a wide range of other applications.

Toggle colour for commercial MCBs changes dependant on the rating as shown below:

	< 2A		16A
	2A		20A
	4A		25A
	6A		32A
	8A		40A
	10A		50A
	13A		63A

Residual current circuit breakers with overcurrent protection (RCBOs)

The Eaton range of combined residual current circuit breakers with integral overload protection (RCBOs), combine the highest level of protection for both people and circuits for both single phase / single module and three phase / four module devices. Fully comply to IEC 61009.

Technical characteristics – single phase RCBOs

- Available from 6A to 45A in types B and C trip characteristics with a choice of 10mA, 30mA, and 100mA trip sensitivities.
- Compact modular design, DIN rail mountable, one module wide.
- Suitable for use in Memshield 3 single and three phase distribution boards.
- Unswitched neutral.
- Positive contact indication.
- Rated breaking capacity 10kA.
- Trip test button.

Residual current circuit breakers (RCCBs)

The Eaton range of residual current circuit breakers without integral overload protection (RCCBs), provide protection solutions to a wide range of applications.

The Eaton range of 2 and 4-pole RCDs are available with 10mA, 30mA, 100mA and 300mA sensitivities, and can be equipped with a wide range of modular accessories

Technical characteristics

- Modular design, DIN rail mountable, 2 or 4 modules wide.
- Double and four pole RCD for commercial and industrial applications.
- Rated short circuit capacity 10kA with fuse back up.
- Trip sensitivities 10, 30, 100 and 300mA.
- Positive contact indication.
- Test trip button.
- Rated currents from 16–100A.

Technical characteristics – three phase RCBOs

- Options from 6A to 32A in type B, C, and D trip characteristics with a choice of 30mA, 100mA, and 300mA trip sensitivities.
- Compact modular design, DIN rail mountable, four modules wide.
- Suitable for use in Memshield 3 three phase distribution boards.
- Unswitched neutral.
- Positive contact and earth fault trip indication.
- Rated breaking capacity 10kA.
- Trip test button.

The RCBO takes up 4 pole ways in a 3-phase distribution board, i.e. L1 / L2 / L3 and the 4th pole of the device fits over, and is insulated from, the L1 phase position of the neighbour circuit. Therefore the neighbour circuit only has two phase circuits available for single phase circuit feeds.

Arc Fault Detection Devices (AFDD+)

Eaton's range of AFDD's combine the functionality of an MCB, RCD and AFDD in one package designed in accordance to IEC/EN 62606 & IEC/EN 61009. Ratings are available up to 40A with B & C curve characteristics and 30mA sensitivity. Devices are available in current types A.

Features include:

- Variable installation of N on either left or right
- Tripped indication : MCB, RCCB or AFDD with LED indication of arc faults
- Permanent self monitoring including over heating and over voltage
- Rated breaking capacity up to 10kA (6kA above 25A)

Switches and Twilight Switches

Timers & Twilight Switches are applied in any residential, commercial and industrial buildings wherever automatic control is required on predefined times and/or depending on daylight intensity.

The Eaton range comprises of a wide variety of different products which include analogue Timers, digital Timers, Twilight Switches and Staircase Timers.

These Timers can either be controlled by a 50 Hz netsynchronisation, quartz control and time synchronisation or using the DCF signal or GPS antenna, which guarantees 100% accuracy at all times. Except for net-synchronised timers all units do have self power reserve to secure the time setting and program storage in case a power interruption does occur.

Dedicated computer software and memory cards are available to support the programming of our most advanced timers.

Automatic summer and winter time, holiday and random switching programs complete the functionality of our range.

Twilight Switches are supplied with a remote light sensor, which can be easily installed on the outside wall where the required light intensity threshold can be simply adjusted on the modular device itself.

Technical characteristics (depending on type)

- Modular design.
- Analogue and digital timers.
- Time adjustment by 50 Hz net, quartz control, DCF¹⁾ or GPS signal reception²⁾
- Manual override switching function.
- Power reserve for all quartz and DCF or GPS driven switches.
- Remote Light Sensor for Twilight Switching.

Benefits

- Easily programmable on front of device.
- Computer aided programming software available.
- Compact 18 mm design for restricted space opportunities.
- Separate IP40 covers are available for direct wall mounting.
- High level of accuracy.
- Automatic summer and winter time adjustment.
- Holiday & Random program settings.
- High power reserve up to 10 years.

Notes: 1) Automatic calculation of sunrise and sunset times throughout the year, including the possibility of astro times + / -2 hour shift.
2) The DCF-signal can only be received within a 1000 km radius.

Contactors and impulse switches

Contactors are frequently applied for switching of lamp loads, fans or pumps in both utility as well as industrial areas.

Eaton's "CR" contactors are very specific due to the applied operating coil and the construction of the main contacts. All contactors with ac/dc coils ensure silent operation which is further enhanced by a low power consumption.

Optimal contacts and low heat dissipation guarantee a long lifetime of the contactor which is available in a wide range of characteristics.

Technical characteristics

- Designed according to IEC 60947-4-1 and IEC 61095 standards.
- Suitable for applications in general control, heating & lighting applications.
- Available in 20, 25, 40 & 63 A ratings with up to 4-pole contacts.
- Optional add-on auxiliary contact available.
- DIN modular profile.
- Spacers available to extend lifetime (it is recommended to use 1 spacer between every 2 contactors installed).
- Day/night contactors available with manual override function.

Advantages of Eaton contactors

- Low inrush power for all ac/dc types.
- Availability of combined ac/dc type contactors ensure silent operation.
- Contactors of ac/dc coil type are operable on both ac and dc voltage. The 20 A and 25 A versions are also available with ac coil. All combined ac/dc type versions are equipped with surge protection on the operating coil.
- Equipped with contact indication.
- Optimal quality of contacts and low heat dissipation ensure a long life time.

The feature packed Memshield 3 MCCB panelboard distribution system

A complete range of MCCB panelboards and pan assemblies providing all the options you need from a straightforward panelboard to a comprehensive panelboard system. The range now offers a variety of incoming devices and a greater choice of outgoing ways to provide more flexibility and choice to the user.

- 250A, 400A, 630A & 800A panelboard versions available.
- Can be configured for incomer device at top of panelboard.
- 3 or 4 pole incoming devices can be fitted.
- 4 to 18 outgoing TP ways.
- Outgoing MCCBs up to 400A, available in 25, 36 and 50kA breaking capacity.
- All TP & 4P MCCBs have adjustable thermal and magnetic trip units as standard except for 630A and 800A incomer MCCBs which are fixed thermal / adjustable magnetic trip. MCCBs with additional trip unit functionality are available to special order:
 - Distribution circuit protection, electronic.
 - Motor protection, thermal/magnetic.
 - Motor protection, electronic.
 - Motor protection without overload release.
 - Selective (discriminative) and generator protection, electronic.
- Enclosure degree of protection IP3X (wall-mounted)
- Form 2b type 2 segregation.
- Form 3b type 2 segregation - with finger guards fitted.
- Tin-plated busbar systems throughout the range.
- Incoming and outgoing metering options to ensure Part L2 Building Regulations compliance. Plug-in cabling system provides for faster and error-proof installation.
- Reliable & safe operation assured through DEKRA testing & certification.
- Wide range of extension boxes, metering, surge protection, and earth leakage incomer options available.
- Versatile solution, accommodating different frame size outgoing MCCBs to best match application needs.
- Enhanced safety through fully shrouded incoming devices, to protect against contact with live parts.
- Blanking plates finger protect unused outgoing ways.

Option to remove top and bottom cross rails provides the ability to lay cables into the board instead of feeding them through the gland plate aperture, resulting in big time savings.

The brand-new Memshield 4 MCCB 4-pole panelboard system up to Form 4 / Type 6

A Eaton's 4-pole panelboard system combines highest levels of electrical safety in a late stage with increased efficiency and reduced downtime thanks to system components available off the shelf.

Memshield 4 is cost effective, customizable and optimized to speed up change-over time and the fitting of additional circuits. High levels of separation and compartmentalisation enabling increased operator safety. Design and layout are perfectly coordinated with the existing Memshield 3 panelboard range.

- 400A and 800A panelboard versions available.
- The design suits for top or bottom incomer configuration.
- 4-pole fully shrouded IPXXB plug-in busbar assembly.
- Efficient design enables multiple number of outgoing options (SPN, TPN, 4P) of different frame sizes
- Compact off the shelf panelboard system as well as MCCBs.
- Minimize the gap between small switchboards / factory-built-assemblies and well established Memshield 3 MCCB 3-pole panelboard system

Surge protection devices (SPD) for MCB distribution boards and MCCB panelboards

In order to enable designers, specifiers, and installers to comply with surge protection requirements in BS 7671:2018 - IET Wiring Regulations - 18th Edition (Section 534), Eaton has a combined lightning current and surge arrester, as well as an individual surge arrester to provide a coordinated solution for lightning protection and surge suppression fully tested to BS EN 62305. This range of coordinated enclosed kits provides peace of mind that all equipment has comprehensive transient overvoltage protection caused by lightning strokes and switching in low voltage systems.

Surge arrester protection for distribution boards

EM3SSK1T2 (SPN distribution boards) & **EM3SSK3T2 / EBMAFDDSPDT2 / EBMMPSLSPDT2** (PN distribution boards) technical summary:

- For the protection of low voltage distribution systems against transient overvoltage caused by indirect lightning strike and switching operations.
- The 3+1 circuit offers a universal solution for surge protection in low voltage distribution systems.
- Suitable for TT- and TN-S systems according to IEC 60364-5-53 Clause 534.
- IEC 61643-11 class II tested SPD.
- EN 61643-11 type 2 SPD

Combined lightning arrester and surge arrester protection for distribution boards and panelboards

EM3SSK3T12 / EBMAFDDSPDT12 / EBMMPSLSPDT12 (TPN distribution boards) & **EPBN1SPD123 / EM4PBSPD34** (panelboards) technical summary:

- Lightning protection classes III and IV in accordance with IEC 62305.
- For the protection of low voltage distribution systems against transient overvoltage caused by direct and indirect lightning strike and switching operations.
- Application according to IEC 60364-5-53 Clause 534.
- IEC 61643-11 combined class I and II tested SPD.
- EN 61643-11 combined type 1 and 2 SPD.

Combined lightning arrester and surge arrester protection for panelboards

EPBN1SPD1234 / EM4PBSPD1234 (panelboards) technical summary:

- Lightning protection classes I, II, III and IV in accordance with IEC 62305.
- For the protection of low voltage distribution systems against direct lightning strike into the overhead power supply line or external lightning protection system and against indirect lightning stroke and switching operations.
- Application according to IEC 60364-5-53 Clause 534.
- IEC 61643-11 combined class I and II tested SPD.
- EN 61643-11 combined type 1 and 2 SPD.
- No discharge of ionised gases during operation.

Glasgow fuse-switch-disconnectors & switch-disconnectors

For many years, the Glasgow product name has been synonymous with quality, trust and reliability and as part of our long standing commitment to its tried and tested design we've reinvested for the future by re-tooling the whole range. All units are supplied with fuselinks or switchlinks fitted. Glasgow fuse switch disconnectors and switch disconnectors meet the constructional requirements for isolation of and are type tested to BS EN 60947-3. Conditional short circuit current rating tests at a value of 80kA rms Ue 415V have been carried out with Eaton HRC fuses fitted. Five frame sizes are available to provide a range from 63A to 800A, with utilisation category AC22A and AC23A Ue 415V ratings. Switch-disconnectors fitted with copper links give assigned AC20A Ui 660V and AC21A Ue 415V ratings. All units have retractable operating handles which drive overcentre mechanisms incorporating powerful operating springs. Opening and closing of the switches is thus independent of the action of the operator. Moving contact assemblies can be removed to facilitate installation or for contact inspection or renewal. Flag "on-off" indication is provided and terminal cover shields prevent contact with live metal. TPSN indicates triple-pole and switched neutral, the neutral pole making first and breaking last. Rated Insulation Voltage Ui 660V.

Enclosures

Surface-mounting enclosures comprise heavy gauge steel body plates incorporating cast iron frame members and are rustprotected, with a light grey paint finish (RAL7004). Front access doors, which are detachable, are fitted with dust-excluding gaskets and are interlocked to prevent opening when the switch is 'on'. The interlock can be defeated by a competent person for maintenance purposes. Operating handles may be locked in both the 'on' and 'off' positions. Castell type interlocks can be supplied to special order. Internal fixing holes allow units to be mounted closely side by side and all models have removable top and bottom end plates. These are pierced for connections, divided into front and rear (fixed) portions to simplify cabling using Eaton's MEM series split-type cable boxes, and provided with undrilled cover plates.

Fuses

Glasgow units are designed for use with HRC cartridge fuse links to BS88: Part 2. 63A and 100A units employ off-set contact fuse links. Details of suitable types of HRC cartridge fuse links are listed on page 101. All performance tests have been carried out using Eaton BS88 fuselinks.

Motor ratings

The motor ratings assigned to TPN switch-disconnector units are utilisation category AC23A (frequent operation) to BS EN 60947-3, which calls for make and break testing at 10 and 8 times rated current respectively for units having a motor rating up to and including 100 Amps. Ratings for switch-disconnector-fuses are dependent on suitable HRC fuses being fitted.

Auxiliary equipment

A comprehensive range of extension boxes and spreader boxes is available. Units are fitted with HRC Fuselinks of maximum rating but will accept fuselinks of a lower rating, refer to the Paramount HRC Fuselinks section on page 101. SPSN and TPSN indicate switched neutral. Neutral makes first and breaks last. If DP fuse-switch-disconnectors are required, use SPSN and replace the supplied switch link with a compatible fuselink.

Definitions of utilisation category

AC20a – Connecting and disconnecting under no load condition.

AC21a – Switching of resistive loads including moderate overloads.

AC22a – Switching of mixed resistive and inductive loads including moderate overloads.

AC23a – Switching of motor, or other high inductive loads.

Cable extension boxes

Fabricated sheet steel boxes can be fitted top/bottom of Glasgow switch units to provide additional space for spreading multi-core PVC insulated cables with solid aluminium conductors and for some larger cables with stranded copper conductors. For 1–3PCB, a plain flame retardant plywood plate is provided for fitting between the box and switch unit, the steel endplate supplied fitted to the switch unit being used on the box's cable entry side. For 4PCB, a plain steel plate is provided for cable entry on box. The switch enclosure has 8mm thick insulated endplates fitted both ends. For 5–6PCB, a 10mm thick insulated plate is provided for cable entry on box. The switch enclosure has 10mm thick insulated endplates fitted both ends, 5PCB includes a flame-retardant plywood packer for fitting between PCB and switch unit's endplate to provide lid flange clearance.

Spreader boxes

Cast metal split pattern, supplied with fixing bolts and plain bushes. Two types are available, suitable for straight or angled entry. They permit conductor spreading of larger PVC cables and fit directly on to Glasgow fuse-switch-disconnectors and switch-disconnectors.

Glasgow busbar chamber system

Eaton's busbar chamber system is designed to provide either compact, wall-mounting installations or – by using optional pedestal sets – easily assembled switchboards. Every facility is provided to enable Eaton's switchgear and distribution gear to be mounted easily and economically to busbar chambers which can be applied either to a suitable load-bearing vertical surface; or, by means of a pedestal set, affixed to a vertical surface which need not be load-bearing.

Busbar chambers

These are produced in 100, 200, 400, 630 and 800 Amp. ratings and in four nominal lengths. 100, 200 and 400 Amp units are available in all four sizes; 630 and 800 Amp ratings are offered in the three longest units only. All units in the range share the same height and depth dimensions. Similarly the twin busbars are located in precisely the same positions throughout the range and vary in size only in their front-to-back dimensions according to rating. Detachable end plates enable all units to be extended by coupling to a second busbar chamber using extension sets. Both top and bottom plates are also readily detachable so that marking out and machining can be carried out conveniently on a bench to accommodate Eaton's switchgear either above or below the chamber. Complete mounting kits, including templates, are available for mounting all Exel and Glasgow switchgear. Eaton chambers are fabricated from rust-protected sheet steel with a light grey paint finish. They have been type tested to BS EN 61439 with a rated conditional short circuit current rating of 63kA at Ue 550V and a rated short-time withstand current Icw 20 times nominal rated current for one second. They are designed for use in factory-built assemblies to BS EN 61439. All chambers are subjected to an on-line dielectric test unit which provides a high voltage test between poles; and from poles to earth. Earth continuity is also tested. Rated insulation voltage 660V.

Connection sets for Glasgow fuse-switch-disconnectors & switch-disconnectors

Cable clamps covering all ratings are available for switchgear up to 200A. For connecting Glasgow units of 160A and above, solid copper connection sets are recommended as cost effective and convenient. These comprise pre-formed, insulated links in 4-pole sets supplied with all necessary clamps and fasteners. The appropriate switchgear mounting set (41, 51 or 61 BBMS) must be used with connection sets for 160–800A Glasgow units.

Busbar cable clamps and sockets

Incoming main cable clamps or sockets are not supplied due to the wide range which would be necessary to meet all requirements. Busbar cable clamps comprise plated brass U-clamps and steel slides with all bolts and washers. They are suitable for the connection of small solid or stranded copper conductors and also aluminium conductors using a barrier grease. Busbar cable sockets are plated brass castings complete with clamps and fixings, suitable for the termination of either copper or aluminium conductors. Both clamps and sockets allow for clamping on the busbars without drilling. For cabling direct on to busbars of 630–800A rating a special cable extension is required which can be made to special order.

Switchgear mounting sets

Available for all ratings of Exel switch-disconnectors/switchdisconnector fuses and Glasgow fuse-switch disconnectors and switchdisconnectors enabling these units to be mounted simply and efficiently either above or below the busbar chamber. Each mounting set comprises a template with instructions for machining the top/bottom plate of the busbar chamber; clamping channels, ready pierced for fasteners; all necessary fastenings; and, for Glasgow units, insulated shields and switch filler plates where appropriate.

Exel 2 switch-disconnectors & switch-disconnector fuses

Exel 2 switch disconnectors and switch-disconnector fuses meet the constructional requirements for isolation of and are type tested to BS EN 60947-3. Switches are of the quick make and break type, suitable for use on AC or DC. Units have removable moving contact assemblies to facilitate wiring. Exel 2 surface-mounting enclosures are fabricated from rust-protected sheet steel with a light grey paint finish. Removable blank top and bottom end plates (except for 20 and 32A top end plates which incorporate knockouts) and gasket doors give IP41 protection. Chromium-plated front operated handles, with “ON (I) OFF (O)” indication, and internal fixing enabling units to be mounted closely side by side. Interiors comprise porcelain bases fitted with non-ferrous conducting components.

Fuses and fuse carriers

HRC fuse carriers are designed for offset contact fuse links to BS 88: Part 2. Eaton HRC fuse links fitted to switch-disconnector-fuses are suitable on systems up to 415V AC. Eaton fuses used in these products are also suitable for 250V DC systems. All performance tests have been carried out using Eaton BS88 fuselinks. Units are fitted with HRC Fuselinks of maximum rating but will accept fuselinks of a lower rating, refer to the Paramount HRC Fuselinks section on page 101. HRC pattern switchfuses are fitted with type SCH carriers (20A, 32A, 63A-moulded; 100A, 125A-porcelain).

Motor ratings

The motor ratings assigned to TPN switch-disconnector units are utilisation category AC23A (frequent operation) to BS EN 60947-3, which calls for make and break testing at 10 and 8 times rated current respectively for units having a motor rating up to and including 100 Amps. Ratings for switch-disconnector-fuses are dependent on suitable HRC fuses being fitted.

Cable size

Maximum cable sizes are: 20A–6mm², 32A–10mm², 63A–35mm², 100/125A–70mm².

Type test compliance with standards

This range has been satisfactorily type-tested in accordance with BS EN 60947-3 with Eaton HRC fuselinks fitted.

Rotary isolators

Local switch-disconnectors standard duty, 20–63A, IP65, 3, 3+N, 6, and 8 poles

Complying with IEC/EN 60947-3, VDE 0660, and IEC/EN 60204, the surface mounting range of rotary switch disconnectors are suitable for on load switching of general distribution a.c. power circuits and infrequent duty motor isolation.

Light grey, moulded silicon and halogen free thermoplastic enclosures provide protection to IP65 making them suitable for most indoor and outdoor environmental conditions.

These compact isolators are fitted with red/yellow operating handles padlockable in the 'OFF' position with up to three padlocks.

The enclosure design allows for easy access for cabling. Solid neutral and earth termination points are a standard feature.

Changeover switches

20-63A, IP65, 4 pole

Suitable for on-load control of alternative supplies. Surface mounted, 4 pole on-load changeover switches have a rated voltage of 690V.

Switches comply with IEC/EN 60947-3, VDE 0660, IEC/EN 60204.

In all cases ample cable space is provided for both incoming and outgoing cables. Each unit is provided with an insulated IP65 black handle which may be padlocked in the 'OFF' position. Clear 'ON' (I) and 'OFF' (O) indication is provided.

Exel – distribution fuseboards

The Exel fuseboard range is available with standard enclosures to IP4X for the complete range of 20A to 200A distribution boards. A variety of extra features have been incorporated in the range including increased cabling space, superior door latches and locking devices (there is a choice of barrel lock or padlocking device), improved lid hinges and a unique safety carrier which effectively blanks off a single fuse-way allowing the circuit to be worked on in safety. Safety carriers have no provision for accepting a fuselink. The Exel distribution fuse boards are designed to comply with the requirements of BSEN 61439-2. All phase parts are fully shrouded so that additional circuits may be wired and connected in safety whilst the existing circuits remain live and on load. The type of enclosure available gives protection to IP4X and is supplied with removable endplates. The range covers a wide variety of ratings from 20–200A; 20A and 32A with up to 12 ways in SPN and TPN configurations; 63A up to 8 ways, 100A up to 8 ways and 200A 4 way in TPN configurations. All ratings available with moulded HRC carriers to BS88: Part 2. Testing has been carried out using Eaton 'S' type HRC fuselinks. Fuse base mouldings are of high quality thermosetting material. The fuse units have skirted fuse carriers to prevent accidental contact with live parts when inserting or withdrawing a carrier. Separate shields are provided for the base contacts to prevent accidental contact when the carrier has been withdrawn. All fuseboards are suitable for systems with a rated insulation voltage U_e 660V AC, 500V DC.

Safety carriers

A range of safety carriers are available for insertion in a fusebase when its normal fuse carrier has been removed for isolation. The safety carriers are marked yellow for identification and have no provision for fuselink fixing.

Enclosures

Rust protected sheet steel IP4X enclosures have a light grey paint finish and are fitted with internal fixing holes. Enclosures have a robust, reliable construction. Enclosures for units from 20A to 100A are of all welded construction, 200A IP4X units have cast corner pieces. Removable top and bottom endplates incorporate knockouts on 20A and 32A units while 63–200A boards have blank endplates. Blank endplates are available on request for 20A and 32A boards. The enclosure allows gasketed access doors to be reversed for left hand or right hand opening. All sides are free from external projections and fuseboards can be mounted in inverted form if required.

Main terminations

32A, 2-way fuseboards have the main phase termination (tunnel type) attached to the fusebanks. All other fuseboards have the main terminations mounted on the back of the enclosure and are intended for use with cable sockets (sweating or crimp type) which are not provided. Busbar and main terminals are fully shrouded. A cable shroud to cover the cable socket is provided.

Earthing and neutral bars

Multi-way earthing bars are fitted with an integral earth bolt and have an outgoing terminal per fuse. They are rail mounted adjacent to the fully rated neutral bars. Neutral bars have main terminals of the same capacity as the phase terminals and have one outgoing terminal per fuse. Earth/neutral bar rails are fitted at the bottom of enclosures on 20A and 32A fuseboards and at the top on all others.

HRC cartridge fuselinks, carriers and bases

Eaton's comprehensive range offers a selection of fuses to cater for many applications: Compact 415V a.c. S type industrial fuselinks complying with BS EN 60269-1 (BS88 – 1) or BS88 – 2 with ratings from 2 to 1250A. Skilful design techniques have meant that power dissipation has frequently been reduced despite the significant reduction in barrel size. Many ratings have also been tested for use in circuits up to 250V d.c.

Compact 415V a.c. S type motor circuit protection fuselinks complying with BS EN 60269-1 (BS88 – 1) or BS88 – 2 with ratings from 20M25A to 400M500A. This extended range of fuselinks is designed to withstand the inrush current associated with direct on line start motors whilst saving cost on the size of equipment to which they are fitted by virtue of their small dimensions.

Compact 240V and 415V a.c. SS, SN and SP type offset blade contact fuselinks complying with BS EN 60269-1 (BS88 – 1) or BS88 – 6 with ratings from 2 to 63A for use in industrial and commercial installations.

Compact 415V a.c. J type feeder pillar fuselinks complying with BS88 – 2 (formerly BS88: Part 5) for use by the Electricity Supply Industry in distribution systems. Ratings from 63–400A with 82mm fixing centres and 63–800A with 92mm fixing centres for wedge tightening contacts and 63–250A in ferrule form for single phase pole mounted cut outs.

Eaton HRC fuselinks are manufactured to exacting standards using precision assembly methods and undergo rigorous quality checking before dispatch including resistance testing all production. This ensures that performance will be consistent and conform with published characteristics within close tolerances. Type tests on Eaton equipment have been performed using Eaton fuselinks.

Eaton industrial and general purpose fuselinks have a breaking range and utilisation category gG which replaces the old class Q1 fusing factor. "g" indicates a full range breaking capacity fuselink and "G" indicates a fuselink for general application.

Eaton motor circuit protection fuselinks have a breaking range and utilisation category gM indicating a full range breaking capacity fuselink for the protection of motor circuits. These fuselinks have a dual current rating separated by the letter "M".

The lower current rating is the maximum continuous rating which also determines the rating and size of equipment to which the fuse is fitted. The higher current rating is the time current characteristic of the fuselink which determines its ability to withstand the motor starting current. Their selection frequently permits the use of lower rated switch and/or fusegear than would be the case using gG fuselinks with a consequent cost saving. Type gG fuselinks however may still be used and are the preferred option for assisted start motors where starting currents are reduced.

Eaton fuselinks are designed and manufactured in accordance with a Quality Management System in accordance with ISO 9001. Most fuselinks are ASTA Certified for a breaking capacity of 80kA at 415V a.c. and are endorsed ASTA 20 CERT showing compliance with the rules of the ASTA 20 scheme which includes assessment of the Quality Management System to ISO 9002 and detailed auditing of fuselink manufacture.

Eaton have for many years participated in developing and influencing fuse standards through BEAMA and BSI at national level and IEC at international level and therefore are able to produce designs incorporating forthcoming changes to standards.

Fuse carriers and bases – specification

A range of moulded HRC fuse units designed to accept bolt-in and clip-in HRC fuselinks.

Each unit is fully shrouded to prevent accidental contact with live parts when inserting or withdrawing a carrier and once the carrier has been removed completely.

The carrier and base mouldings are manufactured from high quality thermosetting material.

Units accepting bolt-in HRC fuselinks are available in ratings of 20, 32, 63, 100 and 200A and can be supplied in front connected, front/busbar connected, front/back connected and back connected versions.

They are designed to comply with BS88 – 2 and are suitable for systems up to 660V. Suitable HRC fuselinks are also to BS88 – 2. A full range of neutral links is available.

Those units which accept the clip-in fuselinks are rated at 32A and 63A, 415V.

They comply with BS88 – 2 and accept clip-in HRC fuselinks to the same standard.

Clip-in type units allow fuselinks to be replaced very simply – no tools are required. Fuselinks are removed from the carrier using side pressure on the fuselink end tags while replacement involves a simple push fit only.

Terminal capacities: 20A 6mm², 32A 16mm², 63A 35mm², 100A 70mm², 200A 150mm².

Fuse units are available in four types:

Type A – providing for busbar connection at one end and cable termination at the other.

Type B – providing for cable connection at each end.

Type C – with back connecting studs.

Type D – providing for cable connection at one end with back connecting stud at the other.

Fuse units have been ASTA certified to BS88 – 2 and are suitable for systems up to 660V.

100A fuse units may be fitted with AAO, BAO or OSD fuselinks having 73mm fixing centres if used with adaptor **100MFLK**.

Eaton's wide range of Motor Control Gear and Heating and Lighting Control equipment is an integral part of our single source commitment.

Since the late 1920's we have built countless motor starters, fitted and trusted by generations of contractors, while the increasing requirements of our markets have led us to constantly update and expand our ADS range to allow for an increased choice of current ratings and ingress protection.

This wealth of experience and expertise in the design and manufacture of Motor Control Gear is mirrored by our Heating and Lighting range which offers a versatile and comprehensive choice.

Standards

- IEC 60947-4-1
- VDE 0660
- IEC 60269
- BS EN 60947-4-1

ADS8 AC motor starters

Enclosures – moulded

- 9kW DOL max
- Tough polycarbonate in grey provides high IP protection to IP65
- Start and stop pushbuttons
- Internal earth terminals
- Cable entries – 20mm knockouts for M20 threaded glands

Enclosures – metalclad

- Attractively styled rust protected pressed steel finished in grey polyester powder paint
- Start and mushroom-headed stop pushbuttons
- Substantial earth terminal
- Cable entries – 20mm knockouts for M20 threaded glands

Switch-disconnectors

- Means of isolation and switching for mechanical maintenance
- Padlocking facility available
- Isolators type tested for on-load disconnection
- Interlocked with main cover

Overload relays

- Adjustable thermal pattern connected directly to contactor
- Ambient temperature compensated between -40°C to +60°C
- Phase failure sensitive relays
- Changeover trip contact
- Simple Auto-reset

Contactors

- Modern block type
- 6–15 x 106 mechanical and 1.5 x 106 electrical operations – AC3 duty.
- Provisions for fitting additional auxiliary contacts either N/O or N/C – depending on version

Optional fittings and specials

- Provision for various optional fitments on standard starters
- Special starter arrangements

Eaton's Memshield 3 MCB distribution boards have evolved through an intimate knowledge and feedback from electrical contractors, consulting engineers and end users to provide solutions to a wide range of electrical distribution applications in commercial buildings. Memshield 3 delivers safe, reliable and high performance protection of electrical power distribution systems in accordance with BS EN 61439.

125A/250A TPN, type B distribution boards

- Enclosure degree of protection IP4X (wall-mounted)

Description	Rating (A)	Total no. of outgoing ways	Eaton list number
4 way TPN, type B distribution board	125	4	EBM41
6 way TPN, type B distribution board	125	6	EBM61
8 way TPN, type B distribution board	125	8	EBM81
12 way TPN, type B distribution board	125	12	EBM121
16 way TPN, type B distribution board	125	16	EBM161
12 way TPN, type B distribution board	125/225 ¹⁾	12	EBM122
18 way TPN, type B distribution board	125/250 ¹⁾	18	EBM182
24 way TPN, type B distribution board	125/250 ¹⁾	24	EBM242

¹⁾ 225A/250A options – if used with cable extension box or with cable trunking. See 250A incomer options below

Note: Maximum loading EBM122 -225A

EBM121D

125A SPSN, type B distribution board

- SPSN main switch disconnecter fitted
- Enclosure degree of protection IP4X (wall-mounted)

Description	Rating (A)	Total no. of outgoing ways	Eaton list number
12 way SPSN type B distribution board	125	12	EBM121D

EBMS1253

125A incomer options for type B distribution boards

- Incoming devices supplied separate to distribution board.
- Maximum Cable capacity 50mm²

Description	Rating (A)	Pole configuration	Eaton list number
Switch disconnecter	125	TP	EBMS1253
Switch disconnecter kit (including single phasing link)	125	SPSN	EBMS1251N
Switch disconnecter	125	TPSN	EBMS1253N
Direct connection (lugs connector)	125/250	TP	EBMBT2503
30mA RCCB ¹⁾	100	TPSN	EBMR30
100mA RCCB ¹⁾	100	TPSN	EBMR100
300mA RCCB ¹⁾	100	TPSN	EBMR300
300mA RCCB with time delay	100	TPSN	EBMR300T
Switch disconnecter feeding 125A TP AC1 contactor, housed in extension box	125	TP	EBMCC1253

¹⁾ Includes 50mm² terminal adapter

EBM62H

250A TPN, type B high load distribution board

- These boards include 2 TPN outgoing ways for 27mm MCB (upto 125A)
- Adequate integral cabling space means that no extension box is required.
- Enclosure degree of protection IP4X (wall-mounted)
- Fitted with door lock as standard.

Description	Rating (A)	Total no. of 18mm TP outgoing ways (63A max)	Total no. of 27mm TP outgoing ways (125A max)	Total no. of outgoing ways	Eaton list number
2 way TPN, type B distribution board	200	0	2	2	EBM22H
6 way TPN, type B distribution board	250	4	2	6	EBM62H
8 way TPN, type B distribution board	250	6	2	8	EBM82H
12 way TPN, type B distribution board	250	10	2	12	EBM122H
18 way TPN, type B distribution board	250	16	2	18	EBM182H
24 way TPN, type B distribution board	250	22	2	24	EBM242H

EBMMB250

250A incoming options for type B distribution boards

- Incoming devices supplied separate to distribution board.
- Where used with **EBM122** or **EBM242**, a separate cable extension box or suitable cable trunking is required
- Maximum Cable capacity 120mm²

Description	Rating (A)	Pole configuration	Eaton list number
Switch-disconnector	250	TP	EBMS2503
Direct connection (lugs connector)	250	TP	EBMBT2503
MCCB incomer kit (includes MCCB)	250	TP	EBMMB250
MCCB incomer kit (includes MCCB)	200	TP	EBMMB200
MCCB incomer kit (includes MCCB)	160	TP	EBMMB160
Switch disconnector feeding 250A TP AC1 contactor, housed in extension box	250	TP	EBMCC2503
Single phase conversion kit for 250A rated board only (requires EBMS2503 to be ordered separately)			EBMS25

EBMSL642MB

Split metered power and lighting board – 200A TPN, type B

- Includes factory fitted 200A switch disconnector and two channel meter
- Adequate integral cabling space means that no extension box is required.
- Enclosure degree of protection IP4X (wall-mounted)
- Meter has both pulsed and Modbus outputs as standard.
- Fitted with door lock as standard.
- Single phasing kit included to be used if required

Description	Rating (A)	Total no. of outgoing ways	Installed meter, characteristics	Eaton list number
Split metered TPN, type B distribution board	200	6+4	Modbus + pulsed output, kWh	EBMSL642MPMB
Split metered TPN, type B distribution board	200	8+6	Modbus + pulsed output, kWh	EBMSL862MPMB
Split metered TPN, type B distribution board	200	10+8	Modbus + pulsed output, kWh	EBMSL1082MPMB
Split metered TPN, type B distribution board	200	14+10	Modbus + pulsed output, kWh	EBMSL14102MPMB

EM3SSK3T12

Surge protection device for type B distribution boards

- See page 133 for technical data
- Includes 63A TP type C MCB for protection/isolation

Description	Eaton list number
Enclosed surge protection kit for TPN boards – type 1&2	EM3SSK3T12
Enclosed surge protection kit for TPN boards – type 2	EM3SSK3T2

EBMAFDD141

**125A AFDD type B TPN distribution board**

- Enclosure will accept Eaton 2-pole, 3 module, AFDDs
- Optional internal SPD
- Enclosure degree of protection IP4X (wall mounted)
- Short circuit rating 10kA

see page 122 for technical data and page 125 for overall dimensions

Description	Rating (A)	Total no. of AFDD outgoing ways	Eaton List number
14 way AFDD, TPN, type B distribution board	125	14	EBMAFDD141
24 way AFDD, TPN, type B distribution board	125	24	EBMAFDD241
36 way AFDD, TPN, type B distribution board	125	36	EBMAFDD361

Incomer options

- Incomer devices supplied separately to distribution boards
- Maximum cable capacity 50mm²

Description	Rating (A)	Pole configuration	Eaton List number
Switch Disconnecter - 4 pole	125	TPSN	EMS1253N
Switch Disconnecter - 3 pole	125	TP	EMS1253
Neutral link kit - required when using 3 pole device	125		EBMAFDDN

EBMAFDDSPDT2

**Surge Protection Device for AFDD distribution board**

- Includes 63A TPN type C MCB for protection and isolation
- Includes all connecting cables and fixings

Description	Eaton List number
Surge protection kit for AFDD DB - type 2	EBMAFDDSPDT2
Surge protection kit for AFDD DB - type 1&2	EBMAFDDSPDT12

Accessories for AFDD distribution board

Description	Eaton List number
Separation shield - to separate boards mounted on top of each other.	EBMAFDDSS
Single phasing kit	EBMAFDDSP
Multi board alignment spacer - 20mm	EBMAFDDSS20

EBMMPCT250

Meterpack assemblies – TPN, type B distribution boards

Description	Rating (A) (total load)	Installed meter, characteristics	Eaton list number
Meterpack for TPN, type B distribution boards	250	Pulsed output, kWh	EBMMPCT250
Meterpack for TPN, type B distribution boards	250	Modbus + pulsed output, kWh	EBMMPCT250M
Meterpack for TPN, type B distribution boards	250	MID certified meter	EBMMPCT250MID
Double meterpack for 2 x TPN, type B distribution boards	250	Pulsed output, kWh	EBMMPSL250
Double meterpack for 2 x TPN, type B distribution boards	250	Modbus + pulsed output, kWh	EBMMPSL250M
Double meterpack for 2 x TPN, type B distribution boards	250	MID certified meter	EBMMPSL250MID
Double meterpack for 2 x TPN, type B distribution boards	125	Pulsed output, kWh	EBMMPSL125
Double meterpack for 2 x TPN, type B distribution boards	125	Modbus + pulsed output, kWh	EBMMPSL125M
Double meterpack for 2 x TPN, type B distribution boards	125	MID certified meter	EBMMPSL125MID
Meterpack for TPN, type B distribution boards	120	MID certified meter	EBMMPDC120

EBMMPSL250MID

Multi meterpack assemblies

- Delivered as 250A lugs incomer
- Feed off load side terminals with up to 4 load cables per phase to multiple boards (not supplied).
- Optional load side protective devices EM*S and EM*H can be added to the load circuits (not supplied).
- Load cables can be grouped and passed through the CTs to suit metering requirements which allows a 250A supply to be split between multiple boards but still be metered as single or combined load.
- 2 or 4 channel input meter provided.
- 2 or 3 CTs provided (can add 4th in RH side of Multi meter pack or in adjoining boards).
- Optional internal SPD
- Short circuit rating 10kA

see page 122 for technical data and page 130 for overall dimensions

Description	Rating (A) (Total Load)	Installed meter characteristics	Eaton List number
Multi meterpack - double	250	MID certified meter	EBMMPSL250DMID
Multi meterpack - quad	250	Modbus + pulsed output	EBMMPSL250QM

EBMMPSLSPDT12

Surge protection device for MMP

- Includes 63A TP type C MCB for protection and isolation and all connecting cables and fixings

Description	Eaton List number
Surge protection kit for Multi meter packs - type 2	EBMMPSLSPDT2
Surge protection kit for Multi meter packs - type 1&2	EBMMPSLSPDT12

Accessories

Description	Eaton List number
Bridging spacer H50xW880 - to provide larger cabling space to feed parallel boards	EBMMPSLS50

Optional 3P MCB load protection

Protective devices EM*S and EM*H can be added to protect the load circuits. The board can disperse a maximum current of 250A which can be split between a combination of MCBs – see table below.

EM*S - 125A 27mm 3P MCB = 81mm wide

EM*H - 63A 18mm 3P MCB = 54mm wide

Available space on din rail = 272mm.

Maximum Thermal Ratings

LUGS Incomer = 250A max

EM*S - 125A 27mm MCB = 102A max

EM*H - 63A 18mm MCB = 55A max

Required Load cables: Tri-Rated to BS 6231

125A MCB = 50mm²

63A MCB = 16mm²

Possible 3P MCB Combinations:

Number of protected circuits

2	3	3	3	3	4	4	4	5
EM*S +	EM*S	EM*S	EM*S	EM*H	EM*S	EM*S	EM*H	EM*H
EM*S +	EM*S	EM*S	EM*H	EM*H	EM*S	EM*H	EM*H	EM*H
	EM*S	EM*H	EM*H	EM*H	EM*H	EM*H	EM*H	EM*H
					EM*H	EM*H	EM*H	EM*H
212A	250A	250A	212A	165A	250A	250A	220A	250A

Protective device's maximum combined current

+ 106A if only 2 devices (this includes all load MCBs)

EMDH104

**Outgoing devices – MCBs – 10/15kA, single pole**

- Trip types B, C and D
- Dual rated, 10kA to IEC 60898 and 15kA to IEC 60947-2

Description	Rated current (A)	Width (mm)	Short circuit rating (kA)	Eaton list number Trip type B	Trip type C	Trip type D

EMCH116R30C

Outgoing devices, RCBOs single pole – trip type C – 30mA sensitivity

- Eaton's range of residual current circuit breakers with integral overload protection (RCBOs), are manufactured to IEC/EN 61009 and meet the latest European and international standards.
- For other RCBO sensitivity options refer to full details on page 45.

Description	Rating (A)	Trip type	Sensitivity (mA)	Eaton list number
Eaton RCBO 6A 10kA type C SP	6	C	30	EMCH106R30C
Eaton RCBO 10A 10kA type C SP	10	C	30	EMCH110R30C

EMBP

General accessories, type B

Description	Eaton list number
MCB blanking module – 18mm	EMBP
Half MCB blanking strip – 9mm	EMABP
MCB blanking module – 27mm	EMBPH
Universal device lockout attachment – fits MCBs, RCCBs and RCBOs	ASPDL
Lockout attachment for 27mm MCBs	ASPDL27
Lockout attachment for 250A switch/MCCB	131669
Shunt trip 230-240V AC for 250A switch/MCCB	158056
Undervoltage release 230–240V AC for 250A switch/MCCB	158053
Padlock suitable for ASPDL & ASPDL27	PD2
Door barrel lock with 2 keys	EMDL
Door padlocking kit	EMPL
Padlock suitable for EMPL	PD1
Top/bottom gland plate	EBMGP4
IP42 gland plate kit	EMGP142
Cable trunking interface kit	EBMTK
Spare way label 12 way – pack of 5	EBLB1
Spare way label 18 way – pack of 5	EBLB2

EBMTK

EBMXPC1

Cable extension boxes, type B

Description	Box height	Eaton list number
Cable spreader extension box	180mm	EBMXPC1
Cable spreader extension box	250mm	EBMXPC2

EBMNE8

High integrity/clean earth kit

Description	No. of ways	Eaton list number
High integrity/clean earth kit for type B Board	8	EBMNE8

Note: Up to 4 high integrity earth bars can be fitted to a type B distribution board

EBMXDC9

Modular enclosures

- Modular enclosures will accept MCBs, RCCBs, RCBOs, fuse modules and command control products.
- Modular enclosures **EBMXDC6** to **EBMXDC45** are fitted with earth and neutral bars as standard.
- Modular enclosures **EBMXDC15** and **EBMXDCG15** have same profile width suitable for mounting onto type A, SPN distribution board **EAM13** or any type B, TPN distribution board.

See page 129 for technical data and overall dimensions.

Description	Capacity in 18mm modules	Glazed door	Eaton list number
Modular enclosure, 15 module din rail – glazed door	15	Yes	EBMXDCG15
Modular enclosure, 6 module din rail – unglazed door	6	No	EBMXDC6
Modular enclosure, 9 module din rail – unglazed door	9	No	EBMXDC9
Modular enclosure, 15 module din rail – unglazed door	15	No	EBMXDC15
Modular enclosure, 18 module din rail – unglazed door	18	No	EBMXDC18
Modular enclosure, 2 x 15 module din rail – unglazed door	30	No	EBMXDC30
Modular enclosure, 3 x 15 module din rail – unglazed door	45	No	EBMXDC45
Half MCB blanking strip – 9mm	–	–	EMABP

EBMXE15

Enclosure accessories

Description	Eaton list number
Additional earth bar (15 additional holes)	EBMXE15
Door barrel lock with 2 keys	EMDL
Door padlocking kit	EMPL
Padlock suitable for EMPL	PD1

Distribution boards type A and type B – cable capacities

Cable capacities	Type A	Type B
125A switch disconnecter	50mm ²	50mm ²
100A RCCB (type A = 90A)	35mm ²	50mm ²
250A switch disconnecter	–	120mm ² (+ M8 lugs)
160A–250A MCCB incomer	–	250A = 120mm ² (+ M8 lugs)
100A direct connection kit	35mm ²	–
250A direct connection lugs	–	120mm ² (+ M8 lugs)
125A contactor incomer	–	50mm ²
250A contactor incomer	–	120mm ² (+ M8 lugs)
Enclosure earth stud	M6	M8
Incoming earth terminal	25mm ²	125A = 25mm ² , 250A = 70mm ²
Incoming neutral terminal	90/100A = 35mm ² , 125A = 50mm ²	125A = 50mm ² , 250A = 120mm ² (+ M8 lugs)
Outgoing earth terminal	25mm ²	25mm ²
Outgoing neutral terminal	25mm ²	25mm ²

Interiors & incoming devices for single phase and three phase

Eaton MCB pan assemblies offer a high degree of flexibility for custom applications. SPN types are available with 4, 7, 10, 13, and 16 ways. TPN types are available with 4, 6, 8, 12, 18 and 24 ways.

Technical characteristics

- Eaton MCB pan assemblies are suitable for inclusion in other factory built assemblies and as replacements for distribution board interiors.
- MCB pan assemblies feature fully shrouded busbars.

See pages 131 for the technical details of Eaton MCB pan assemblies.

EAMP10

125A SPN type A pan assemblies with earth & neutral bars

Description	Rating (A)	Total no. of outgoing ways	Eaton list number
4 way SPN, type A pan assembly	125	4	EAMP4
7 way SPN, type A pan assembly	125	7	EAMP7
10 way SPN, type A pan assembly	125	10	EAMP10
13 way SPN, type A pan assembly	125	13	EAMP13
16 way SPN, type A pan assembly	125	16	EAMP16

EAMS1251N

Incoming devices for SPN, type A pan assemblies

- Incoming devices supplied separate to pan assembly

Description	Rating (A)	Poles	Sensitivity (mA)	Eaton list number
Switch-disconnector	125	SPSN	—	EAMS1251N
RCCB	100	1P+N	30	EAMS100HE
RCCB	100	1P+N	100	EAMS100ME
RCCB	100	1P+N	300	EAMS100LE
Direct connection kit	100	1P+N	—	EAMBT1002

EBMP61

125A/250A TPN type B pan assemblies with earth & neutral bars

Description	Rating (A)	Total no. of outgoing ways	Eaton list number
4 way TPN, type B pan assembly	125	4	EBMP41
6 way TPN, type B pan assembly	125	6	EBMP61
8 way TPN, type B pan assembly	125	8	EBMP81
12 way TPN, type B pan assembly	125	12	EBMP121
12 way TPN, type B pan assembly	225	12	EBMP122
18 way TPN, type B pan assembly	250	18	EBMP182
24 way TPN, type B pan assembly	250	24	EBMP242

EBMS1253

125A incomer options for type B pan assemblies

- Incoming devices supplied separate to pan assembly
- Maximum cable capacity Isolator 50mm² and RCCB 35mm²

Description	Rating (A)	Pole configuration	Eaton list number
Switch disconnector	125	TP	EBMS1253
Switch disconnector kit (including single phasing link)	125	SPSN	EBMS1251N
Switch disconnector	125	TPSN	EBMS1253N
Direct connection (lugs connector)	250	TP	EBMBT2503
30mA RCCB	100	TPSN	EBMR30
100mA RCCB	100	TPSN	EBMR100
300mA RCCB	100	TPSN	EBMR300
300mA RCCB with time delay	100	TPSN	EBMR300T

EBMMB250

**250A incomer options for type B pan assemblies**

- Incoming devices supplied separate to pan assembly
- Maximum Cable capacity 120mm²

Description	Rating (A)	Pole configuration	Eaton list number
Switch-disconnector	250	TP	EBMS2503
Direct connection (lugs connector)	250	TP	EBMBT2503
MCCB incomer kit (includes mCCB)	250	TP	EBMMB250
MCCB incomer kit (includes MCCB)	200	TP	EBMMB200
MCCB incomer kit (includes mCCB)	160	TP	EBMMB160
Single phase conversion kit for 250A rated board only (requires EBMS2503 to be ordered separately)			EBMS25

Eaton provides a comprehensive range of modular solutions for circuit protection and control. Eaton's 10/15kA MCBs are high performance current limiting devices with the ability to disconnect overloads and short circuits. They are available with trip types B, C and D with many features of benefit to all customers. RCBOs with overload protection combine protection for people and circuits in a single module width device where space is at a premium.

Double pole and four pole RCCBs are available in a range of current ratings and four trip sensitivities, 10, 30, 100 and 300mA.

3.1	MINIATURE CIRCUIT BREAKERS (MCBs)	42
3.2	RESIDUAL CURRENT CIRCUIT BREAKERS (RCCBs)	44
3.3	RESIDUAL CURRENT CIRCUIT BREAKER WITH OVERCURRENT PROTECTION (RCBOs)	45
3.4	ACCESSORIES	47

3.1

Distribution board switch and protection devices

Miniature circuit breakers, MCBs, 18mm, 1A-63A

MCBs are available in current ratings from 1A–63A, with trip types B, C and D, 10kA to IEC 60898 and 15kA to IEC 60947-2
See page 136 for technical data and overall dimensions

EMDH104

Miniature circuit breakers – dual rated 10/15kA, single pole

Description	Rated current (A)	Width (mm)	Short circuit rating (kA)	Eaton list number Trip type B	Trip type C	Trip type D
Miniature circuit breaker	1	18	10/15	EMBH101	EMCH101	EMDH101

ASPDL

**Padlocking devices**

For MCBs, RCCBs, RCBOs & switch disconnectors

- The wide range of Eaton devices are complimented by a range of padlocking devices.
- For MCBs and RCCBs the device mechanism is trip free which allows it to be padlocked 'ON' for security, but in the event of a fault condition the device will still operate to disconnect the fault. The device will move to the tripped position when the lock is removed. These devices can also be padlocked in the 'OFF' position.

Description	Eaton list number
Universal device lockout attachment – fits MCBs, RCCBs and RCBOs	ASPDL
Lockout attachment for 27mm MCBs	ASPDL27
Padlock	PD2

ASALMSN

**Auxiliary and alarm contacts including test function**

For 18mm MCB & RCBO

Auxiliary and alarm contact devices can be fitted together on one MCB. Each is incorporated in a 1/2 module (9 mm) casing with terminals protected to IP 20 capable of accepting cable up to 2.5 mm². These devices are designed and manufactured to IEC 60947-5-1 and incorporate a changeover switch providing remote indication of an MCB which has tripped under fault conditions.

Technical characteristics

- This auxiliary switch allows remote indication of the position of the MCB contacts.
- Auxiliary and Alarm contact ratings:
 - AC14 240 Vac 50Hz, 6A.
 - DC14 125 Vdc, 1A.
- The auxiliary contact will not differentiate between an MCB that is "off" or "tripped".
- The auxiliary contact can be used in conjunction with a remote supply and signal lamps, bells or buzzers.

Description	Quantity per carton	Eaton list number
Auxiliary switch incorporating a test function	1	ASAXSN⁽¹⁾
Alarm switch incorporating reset and test function	1	ASALMSN⁽¹⁾

⁽¹⁾ Not suitable for use in distribution boards

ASSNTSN415

**Shunt trips**

For 18mm MCB & RCBO

Technical characteristics

- Suitable for all Eaton MCBs including those with either auxiliary or alarm contacts.
- A shunt trip and undervoltage release can be fitted together on one MCB.
- Each is incorporated in a 1 module (18 mm) casing with terminals protected to IP 20 capable of accepting cable up to 2.5 mm².
- The shunt trip and UVR are simply clipped to the left hand side of an MCB and have terminals at one end to allow connection to pan assemblies and comb busbar.
- A shunt release provides remote tripping of an MCB with three voltage options for AC & DC applications.

Description	dc characteristics	ac characteristics	Quantity per carton	Eaton list number
MCB shunt trip	48 V–60 Vdc	48 V–110 Vac	1	ASSNTSN110⁽¹⁾
MCB shunt trip	110 Vdc	240 Vac	1	ASSNTSN415⁽¹⁾

⁽¹⁾ Not suitable for use in distribution boards
Other voltages are available.

ASUVRSC230

**Under voltage release**

For 18mm MCB & RCBO

- Under voltage release (UVR) for remote tripping of an emergency stop loop.
- The UVR is simply clipped to the left hand side of an MCB and have terminals at one end to allow connection to pan assemblies and comb busbar.

Description	ac characteristics	Quantity per carton	Eaton list number
Under voltage release	240 Vac	1	ASUVRSC230⁽¹⁾

⁽¹⁾ Not suitable for use in distribution boards

Eaton's wide range of modular timers and twilight switches are suitable for any residential or commercial application offering automatic lighting control. Contactors are frequently applied for switching of lamp loads, fans or pumps in both utility as well as industrial areas.

4.1 MODULAR SWITCHES / TIMERS AND TWILIGHT SWITCHES

Universal declaration type coding	49
Analogue time switches - 50 Hz mains synchronised	50
Analogue time switches - Quartz controlled	50
Analogue weekly time switches - Quartz controlled	50
Digital weekly time switches, 1 channel	51
Digital weekly time switches, 2 channel	52
Twilight switches for DIN rail mounting	53
Twilight switch for surface mounting	54
Antenna for DCF signal reception	55
Antenna including power supply for GPS signal reception	55
Programming software kit including memory card	55

4.2 CONTACTORS

Contactors, 20A	56
Contactors, 25A	56
Contactors, 40A	56
Contactors, 63A	57
Day/night contactors	57
Auxiliary contacts	57

4.3 TRANSFORMERS AND EARTH LEAKAGE RELAYS

Transformer 8/12v 1.0A	58
Earth leakage relays and current transformers	58

Timers & Twilight Switches are applied in any residential, commercial and industrial buildings wherever automatic control is required on predefined times and/or depending on daylight intensity.

The Eaton range comprises of a wide variety of different products which include analogue Timers, digital Timers, Twilight Switches and Staircase Timers.

These Timers can either be controlled by a 50Hz net-synchronisation, quartz control and time synchronisation or using the DCF signal or GPS antenna, which guarantees 100% accuracy at all times. Except for net-synchronised timers all units do have self power reserve to secure the time setting and program storage in case a power interruption does occur.

Dedicated computer software and memory cards are available to support the programming of our most advanced timers. Automatic summer and winter time, holiday and random switching programs complete the functionality of our range.

Twilight Switches are supplied with a remote light sensor, which can be easily installed on the outside wall where the required light intensity threshold can be simply adjusted on the modular device itself.

Technical characteristics (depending on type)

- Modular design.
- Analogue and digital timers.
- Time adjustment by 50 Hz net, quartz control, DCF1) or GPS signal reception 2).
- Manual override switching function.
- Power reserve for all quartz and DCF or GPS driven switches.
- Remote light sensor for twilight switching.

Benefits

- Easily programmable on front of device.
- Computer aided programming software available.
- Compact 18 mm design for restricted space opportunities.
- Separate IP40 covers are available for direct wall mounting.
- High level of accuracy.
- Automatic summer and winter time adjustment.
- Holiday & Random program settings.
- High power reserve up to 10 years.

Notes:

¹⁾ Automatic calculation of sunrise and sunset times throughout the year, including the possibility of astro times + / -2 hour shift.

²⁾ The DCF-signal can only be received within a 1000 km radius.

Universal declaration type coding

Type coding - analogue switches

TS	Q	D	1NO

**Analogue time switches - Quartz controlled****18 mm compact design**

Program range	Type	Channels	Contact configuration	Power reserve	Min. cycling time	Width	Type	QPC	Eaton list number
Day	Quartz	1	NO	3 y rs	15 min.	17.5 mm	TSQD1NO	1	167388

167392

**Analogue weekly timer switches - Quartz controlled****Standard version**

Program range	Type	Channels	Contact configuration	Power reserve	Min. cycling time	Width	Type	QPC	Eaton list number
Week	Quartz	1	CO	200 hrs	2 hrs	52.5 mm	TSQW1CO	1	167392

Technical characteristics

- Operating voltage 230 V / 50 - 60 Hz.
- 1 or 2 channel.
- Quartz controlled.
- 3 to 10 year power reserve.
- Weekly programme.
- Manual ON (and depending on type OFF) switching.
- Text-oriented user guidance in display.
- Display back light (switchable).
- Compact 18mm design for restricted space.
- Automatic summer and winter adjustment.
- Holiday programme.
- Zero crossing switching relay for longer life.
- Integrated operating hour counter.
- TSDW1CO, TSDW2CO, TSDW1COA, TSDW1CODG:
- Interface for memory.

See page 143 for technical data

167379

Digital weekly time switches, 1 channel

Standard version

Program range	Type	Channels	Contact configuration	Power reserve	Min. cycling time	Width	Type	QPC	Eaton list number
Week	Quartz	1	CO	10 year	1 min.	35.8 mm	TSDW1CO	1	167379

4.1

Modular control and switching devices

Digital timers

167380

Digital weekly time switches, 2 channels

Standard version

Program range	Type	Channels	Contact configuration	Power reserve	Min. cycling time	Width	Type	QPC	Eaton list number
Week	Quartz	2	2 x CO	10 year	1 min.	35.8 mm T	TSDW2CO	1	167380

Technical characteristics

- Operating voltage 220 - 240 V / 50 - 60 Hz.
- 1 channel.
- Controlled by external light sensor (supplied).
- Built-in time delay included for unwanted switching e.g. due to car lamp influences (adjustable to type SRSD1COW and SRCD1CO). Manual ON (and depending on type OFF) switching.
- Text-oriented user guidance in display.
- Switching status indication.
- Adjustable light intensity level.

SRCD1CO

- Manual ON and OFF switching.
- Back lit display.
- Automatic summer and winter time adjustment.
- Holiday programme.
- Zero crossing switching relay for longer life.
- Integrated operating hour counter.
- Memory interface.
- Test function.

Program range	Channels	Adjustable sensitivity	Contact configuration	Width	Type	QPC	Eaton list number
Week	1	2 - 200 lux	CO	72 mm	SRCD1CO	1	167377

Technical characteristics

- Operating voltage 220 - 230 V / 50 - 60 Hz.
- 1 channel.
- Integrated light sensor.
- Time delay included for unwanted switching, adjustable (e.g. due to car lamp influences).
- Back or bottom cable entry.
- Adjustable light intensity on the outside.
- Large light level (180 degrees).
- Test button.
- Degree of protection: IP55.

See page 56 for accessories

See page 145 for technical data

167376

**Twilight switch for surface mounting****1 channel**

Program range	Channels	Adjustable sensitivity	Contact configuration	Width	Type	QPC	Eaton list number
Week	1	2 - 2.000 lux	NO	85 mm	SRSW1NO	1	167376

167384

**Antenna for DCF signal reception**

- By using DCF reception 100% accuracy is obtained. A DCF antenna is required to be mounted on an outside wall. The DCF signal reception is only operable when the timer is connected to the remote DCF antenna and fed by a DCF power supply.
- DCF antenna for digital TSDW1CODG.

Description	Type	QPC	Eaton list number
DCF-antenna 1	TSADCF	1	167384

167385

**Antenna includes power supply for GPS signal reception**

- Antenna includes power supply for TSDW1CODG.

Description	Type	QPC	Eaton list number
Antenna for GPS signal reception, includes power supply	TSAGPSKIT	1	167385

167387

**Programming software kit**

- For SRCD1CO, TSDW1CO, TSDW2CO, TSDW1COA, TSDW1CODG.

Description	Type	QPC	Eaton list number
Programming software kit including adaptor cable, software and memory card	TSAMEMKIT	1	167386
Memory card	TSAMEM	1	167387

See pages 141-146 for timers and twilight switches technical data and overall dimensions.

- For other coil voltages contact technical support

See pages 147-148 for contactors technical data and overall dimensions.

CR2011230A

Contactors, 20 A – ac coil

When several contactors are mounted it is advisable to fit a blanking module, List number **EMBP**, every two contactors.

CRM2540230A

**Day/night contactors, 20–25 A – ac coil**

When several contactors are mounted it is advisable to fit a blanking module or spacer every two contactors. Day/night contactors do have a manual override function, which enables the user to bring the contactor in either a forced “ON” or “OFF” position. The contactor can only be brought into the forced “ON” position when it is de-energised. When the contactor is energised the operation will return into the normal/automatic position.

Auxiliary	6	9	2 NO	CRA620

4.3

Modular control and switching devices

Transformers and earth leakage relays

TR-G3/8

Transformers

Description	Volts	Amps	Width (mm)	Module	Eaton list number
Bell Transformer 2 module	12	0.6	36	2	TR-G3/8
	4/8	1.0	36	2	TR-G3/8

Earth leakage relays & CTs

Suitable for use with all Eaton MCCBs & MCBs to provide add-on earth leakage protection functionality. The earth leakage relay is used with an **ELRCT** series current transformer (core balance) and an appropriate MCB/MCCB shunt trip or undervoltage release. Power supply required 220-240V ac,

50/60Hz. Output contacts (volt-free) rated at 250V ac, 6A. Power and system LEDs show status of the relay, CT continuity, level of earth leakage, earth leakage trip. Eaton earth leakage relays are designed & tested in accordance with IEC61008-1.

See page 149 for dimensional details.

PFR-5

Earth leakage relays – adjustable trip

Description	Sensitivity	Time delay	Width	Eaton list number
Earth leakage relay	Adjustable 30mA, 100mA, 300mA, 500mA, 1A, 3A, 5A	Adjustable 0.02, 0.1, 0.3, 0.5, 1, 3, 5s	36mm	PFR-5

PFR-003

Earth leakage relays – fixed trip

Description	Sensitivity	Time delay	Width	Eaton list number
Earth leakage relay	Fixed 30mA	Instantaneous (0.02s)	36mm	PFR-003
Earth leakage relay	Fixed 300mA	Instantaneous (0.02s)	36mm	PFR-03

PFR-W-20–
PFR-W-105

Current transformers (core balance)

- One current transformer required per relay.

Description	Inner dimension	Eaton list number
Current Transformer	20mm diameter	PFR-W-20
	30mm diameter	PFR-W-30
	35mm diameter	PFR-W-35
	70mm diameter	PFR-W-70

5.8	LIGHTNING & SURGE SUPPRESSION FOR MCCB PANELBOARDS	84
5.9	MCCB PAN ASSEMBLIES	85

5.1

Memshield 3 MCCB panelboards and associated devices

Incoming device ratings up to 250A – outgoing device ratings up to 160A

Specification

- Panelboards to IEC61439-2
- Form 3b Type 2 - with finger guards fitted
- Busbar system KEMA certified 50kA Icc, Icw 25kA 1s
- Enclosure degree of protection IP3X (wall-mounted)
- MCCBs to IEC60947-2. kA ratings shown are Ics=Icu at 400V ac
- Switch disconnectors to IEC60947-3

Features

- 4, 6, 8, or 12 outgoing TP ways
- Outgoing devices; NZM1 16A–125A SP & 20A–160A TP
- Tin-plated busbars
- Can be configured for incomer device at top of panelboard
- Removable side gland plates as standard
- Wide range of extension boxes, metering, surge protection, and earth leakage incomer options available

See pages 151-153 for dimensions.

EPBN1425

- Minimum ordering requirement: panelboard + incoming device + incomer connection kit + outgoing devices + blanking plates

Description	Associated incoming device	Current rating (A)	No. of ways	Eaton list number
Incoming rating up to 250A, outgoing ratings up to 160A	NZM2 MCCB or N2 switch disconnector or direct lugs connection	250	4	EPBN1425
			6	EPBN1625
			8	EPBN1825
			12	EPBN11225

NZMC2-A250KCO

MCCB incoming device

- 36kA or 50kA options
- Select appropriate incomer device from table below
- Maximum cable capacity 185mm²
- Adjustable trip. Thermal trip adjustment 0.8 to 1 x I_n, Magnetic trip adjustment 6 to 10 x I_n

Poles	Incoming device type	Current rating (A)	Eaton list number

125	NZMB1-1-AF125	NZMB1-A125
160	–	NZMB1-A160

¹⁾ 36kA triple pole also available, change 'B' to 'C' in list number, ie **NZMC1-A125**

²⁾ 50kA triple pole also available, change 'B' to 'N' in list number, ie **NZMN1-A125**

EPBN1BP1

Accessories

Description	Eaton list number
SP blanking module NZM1 frame (i.e. order 3 per TP way)	EPBN1BP1
Panel door lock with 2 keys (have same key code)	EPBDLK1
Finger guard for outgoing NZM1 1P required for Form 3b Type 2	NZM1-1-XIPK
Finger guard for outgoing NZM1 3P required for Form 3b Type 2	NZM1-XIPK
Shunt trip 208-250AC/DC for NZM1 (excl. 1P)	259744
Shunt trip 208-250AC/DC for NZM3/N3	259763
Undervoltage release 208–240AC for NZM1 (excl. 1P)	259471
Undervoltage release 208–240AC for NZM3/N3	259499
Handle lock for MCCB type NZM1	260199
Handle lock for MCCB types NZM2 and NZM3	260201

EPBN1425SXB

Cable extension boxes – side mounted

Description	Eaton list number
To fit 4 way panelboard EPBN1425	EPBN1425SXB
To fit 6 way panelboard EPBN1625	EPBN1625SXB
To fit 8 way panelboard EPBN1825	EPBN1825SXB
To fit 12 way panelboard EPBN11225	EPBN11225SXB

5.1

Memshield 3 MCCB panelboards and associated devices

Incoming device ratings up to 250A – outgoing device ratings up to 160A

EPBN1EX250

Cable extension boxes – top/bottom mounted

Description	Eaton list number
250mm high	EPBN1EX250

EPBN1CX250

Corner filler boxes

Description	Eaton list number
For use where top/bottom/meter boxes are fitted in conjunction with side cable boxes	EPBN1CX250

EPBN1EXDIN

Din rail extension boxes

Description	Height	Number 18mm Din modules	Eaton list number
For housing din rail mounted command/control equipment, ie timers/contactors	250mm	15	EPBN1EXDIN

Metering components – refer to pages 82-85 for more explanation

(Requires appropriate incomer connection kit with metering option selected from above)

EPBMETER1

Incoming metering – digital

- Includes both Modbus and Pulsed outputs

Description	Eaton list number
Incomer meter enclosure (can be fitted to top or bottom of panelboard). Meter not included	EPBN1EX250M
Multifunction meter measuring parameters: Voltage (P-P / P/N) (individual/average) Current (I1, I2, I3) (individual/average) Frequency Power factor (individual/average) Active, reactive, apparent power (individual/total) Active, reactive, apparent energy (total)	EPBMETER1*
Voltage supply to meter tap off kit (includes protection fuses). One per panelboard required, irrespective of number of meters	EPBN1SUPM

* MID version see page 82

Memshield 3 MCCB panelboards and associated devices

Incoming device ratings up to 250A – outgoing device ratings up to 160A

5.1

EPBN11225SXM

Outgoing side mounted metering – digital

Description	Number of meter spaces in metering enclosure	Number of meter blanking plates included	Eaton list number
Side mounted metering enclosure to fit 4 way panelboard EPBN1425	2	1	EPBN1425SXM⁽¹⁾
Side mounted metering enclosure to fit 6 way panelboard EPBN1625	3	2	EPBN1625SXM⁽¹⁾
Side mounted metering enclosure to fit 8 way panelboard EPBN1825	4	3	EPBN1825SXM⁽¹⁾
Side mounted metering enclosure to fit 12 way panelboard EPBN11225	6	5	EPBN11225SXM⁽¹⁾
Outgoing CT Kit (1 off required per metered outgoing TP way) to suit NZM1 frame MCCBs. 160A maximum rating. Includes CT to meter plug-in cable and meter to meter voltage supply linking cable with connectors			EPBCTMT160
Three phase splitter box to allow separate monitoring of a three phase current transformer on individual energy meters			EPBCTMT3P
Meter includes both Modbus and Pulsed outputs Multifunction meter measuring parameters: Voltage (P-P / P/N) (individual/average) Current (I1, I2, I3) (individual/average) Frequency Power factor (individual/average) Active, reactive, apparent power (individual/total) Active, reactive, apparent energy (total)			EPBMETER1*
Voltage supply to meter tap off kit (includes protection fuses), not required if incoming metering is being used			EPBN1SUPM
Extra long (2m) meter to meter voltage supply linking cable with connectors			EPBN3LKKTm
Extra long (2.5m) CT to meter plug-in cable			EPBN3LKRJ45
CT supporting mount to allow CT to be fitted in side mounted cable extension box if terminal shields being fitted to MCCBs			EPBSXBCTMT
Spare blanking plate for unused meter ways in metering enclosure			EM96BP

⁽¹⁾ Suffix 'M' indicates cut-outs for meters and hinged door for outgoing metering suitable for left and right hand applications. Can be used with side mounted cable extension boxes if required

* MID version see page 82

EPBN1SPD123

Transient voltage surge suppression units, externally mounted in own enclosure

- See page 86 for full technical specification
- Includes 63A TP NZM1 MCCB for protection/isolation
- See page 133 for dimensions

Description	Eaton list number
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes III and IV in accordance with IEC 62305	EPBN1SPD123
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes I, II, III and IV in accordance with IEC 62305	EPBN1SPD1234

EPBKEL250

Earth leakage protection

- Direct bolt-on module used in conjunction with 4-pole incomer device, 250A maximum rating
- Sensitivity adjustable from 0.1A to 3A. Time delay adjustable from 60ms to 450ms

Description	Eaton list number
Earth leakage protection add-on kit for incomer device. 250mm high extension box included	EPBKEL250

Cable size summary

Incoming cables

MCCB or switch disconnector size max/type	185mm ² /tunnel terminals
Direct connection lugs incomer	M8
Neutral	M8
Earth	M10

Outgoing cables

NZM1 MCCB size max/type	70mm ² /cable clamp (95mm ² can be fitted depending on cable manufacturer)
Neutral size max/type	50mm ² tunnel terminals and 2 x M8 bolts
Earth size max/type	50mm ² tunnel terminals

5.2

Memshield 3 MCCB panelboards and associated devices

Incoming device ratings up to 400A – outgoing device ratings up to 160A

Specification

- Panelboards to IEC61439-2. Form 3b Type 2
- Form 3b Type 2 - with finger guards fitted
- Busbar system KEMA certified 50kA Icc, Icw 30kA 1s
- Enclosure degree of protection IP3X (wall-mounted)
- MCCBs to IEC60947-2. kA ratings shown are Ics=Icu at 400V ac
- Switch disconnectors to IEC60947-3

Features

- 6 or 12 outgoing TP ways
- Outgoing devices; NZM1 16A–125A SP & 20A–160A TP
- Tin-plated busbars
- Can be configured for incomer device at top of panelboard
- Removable side gland plates as standard
- Wide range of extension boxes, metering, surge protection, and earth leakage incomer options available

See pages 151 -153 for dimensions.

EPBN1640

- Minimum ordering requirement: panelboard + incoming device + incomer connection kit + outgoing devices + blanking plates

Description	Associated incoming device	Current rating (A)	No. of ways	Eaton list number
Incoming rating up to 400A, outgoing ratings up to 160A	NZM3 MCCB or N3 switch disconnector or direct lugs connection	400	6	EPBN1640
			12	EPBN11240

NZMN3-A400

MCCB incoming device

- 50kA
- Select appropriate incomer device from table below
- Maximum cable capacity 240mm²
- Adjustable trip. Thermal trip adjustment 0.8 to 1 x I_n, Magnetic trip adjustment 6 to 10 x I_n

Poles	Incoming device type	Current rating (A)	Eaton list number Short circuit rating

EPBN2CX250

Corner filler boxes

Description	Eaton list number
For use where top/bottom/meter boxes are fitted in conjunction with side cable boxes	EPBN2CX250

EPBN2EXDIN

Din rail extension boxes

Description	Height	Number 18mm Din modules	Eaton list number
For housing din rail mounted command/control equipment, ie timers/contactors	250mm	15	EPBN2EXDIN

Metering components – refer to pages 82-85 for more explanation

(Requires appropriate incomer connection kit with metering option selected from above)

EPBN2EX250M

Incoming metering – digital

- Includes both Modbus and Pulsed outputs
- See page 82 for detailed selection guide

Description	Eaton list number
Incomer meter enclosure (can be fitted to top or bottom of panelboard). Meter not included	EPBN2EX250M
Multifunction meter measuring parameters: Voltage (P-P / P/N) (individual/average) Current (I1, I2, I3) (individual/average) Frequency Power factor (individual/average) Active, reactive, apparent power (individual/total) Active, reactive, apparent energy (total)	EPBMETER1*
Voltage supply to meter tap off kit (includes protection fuses). One per panelboard required, irrespective of number of meters	EPBN3SUPM

* MID version see page 82

EPBN21240SXM

Outgoing side mounted metering – digital

- See page 84 for detailed selection guide

Description	Number of meter spaces in metering enclosure	Number of meter blanking plates included	Eaton list number
Side mounted metering enclosure to fit 6 way panelboard EPBN1640	3	2	EPBN2640SXM ¹⁾
Side mounted metering enclosure to fit 12 way panelboard EPBN11240	6	5	EPBN21240SXM ¹⁾
Outgoing CT Kit (1 off required per metered outgoing TP way) to suit NZM1 frame MCCBs. 160A maximum rating. Includes CT to meter plug-in cable and meter to meter voltage supply linking cable with connectors			EPBCTMT160
Three phase splitter box to allow separate monitoring of a three phase current transformer on individual energy meters			EPBCTMT3P
Meter includes both Modbus and Pulsed outputs Multifunction meter measuring parameters: Voltage (P-P / P/N) (individual/average) Current (I1, I2, I3) (individual/average) Frequency Power factor (individual/average) Active, reactive, apparent power (individual/total) Active, reactive, apparent energy (total)			EPBMETER1*
Voltage supply to meter tap off kit (includes protection fuses), not required if incoming metering is being used			EPBN3SUPM
Extra long (2m) meter to meter voltage supply linking cable with connectors			EPBN3LKKTM
Extra long (2.5m) CT to meter plug-in cable			EPBN3LKRJ45
CT supporting mount to allow CT to be fitted in side mounted cable extension box if terminal shields being fitted to MCCBs			EPBSXBCTMT
Spare blanking plate for unused meter ways in metering enclosure			EM96BP

¹⁾ Suffix 'M' indicates cut-outs for meters and hinged door for outgoing metering suitable for left and right hand applications. Can be used with side mounted cable extension boxes if required

* MID version see page 82

EPBN1SPD123

Transient voltage surge suppression units, externally mounted in own enclosure

- See page 86 for full technical specification
- Includes 63A TP NZM1 MCCB for protection/isolation
- See page 133 for dimensions

Description	Eaton list number
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes III and IV in accordance with IEC 62305	EPBN1SPD123
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes I, II, III and IV in accordance with IEC 62305	EPBN1SPD1234

EPBKEL400

Earth leakage protection

- Kit comprises 350mm high extension box fitted with earth leakage relay, core balance transformer, all cables/terminals/protection fuses, and 230V shunt trip (for tripping of incomer device). Requires 4-pole incomer device. 400A maximum rating
- Sensitivity adjustable from 30mA to 5A. Time delay adjustable from 0.02 to 5 seconds

Description	Eaton list number
Earth leakage protection add-on module for incomer device	EPBKEL400

Cable size summary

Incoming cables

MCCB or switch disconnector size max/type	240mm ² /M12 bolt
Direct connection lugs incomer	M12
Neutral	M8
Earth	M10

Outgoing cables

NZM1 MCCB size max/type	70mm ² /cable clamp. (95mm ² can be fitted depending on cable manufacturer)
Neutral size max/type	50mm ² tunnel terminals and 2 x M8 bolts
Earth size max/type	50mm ² tunnel terminals

5.3

Memshield 3 MCCB panelboards and associated devices

Incoming device ratings up to 400A – outgoing device ratings up to 250A

Specification

- Panelboards to IEC61439-2
- Form 3b Type 2 - with finger guards fitted
- Busbar system KEMA certified 50kA Icc, Icw 35kA 1s
- Enclosure degree of protection IP3X (wall-mounted)
- MCCBs to IEC60947-2. kA ratings shown are Ics=Icu at 400V ac
- Switch disconnectors to IEC60947-3

Features

- 6, 12 or 18 outgoing TP ways
- Outgoing devices; these panelboards utilise two frame sizes of MCCB: NZM2 125A–250A TP, and NZM1 SP 16A–125A or TP 20A–160A
- Tin-plated busbars
- Can be configured for incomer device at top of panelboard
- Removable side gland plates as standard
- Wide range of extension boxes, metering, surge protection, and earth leakage incomer options available

See pages 151 -153 for dimensions.

EPBN2640

- Minimum ordering requirement: panelboard + incoming device + incomer connection kit + outgoing devices + blanking plates

Description	Associated incoming device	Current rating (A)	No. of outgoing ways	Eaton list number
Incoming rating up to 400A, outgoing ratings up to 250A	NZM3 MCCB or N3 Switch Disconnector or direct lugs connection	400	6 (2 x 250A + 4 x 160A)	EPBN2640
			12 (2 x 250A + 10 x 160A)	EPBN21240
			18 (2 x 250A + 16 x 160A)	EPBN21840

NZMN3-A400

MCCB incoming device

- 50kA
- Select appropriate incomer device from table below
- Maximum cable capacity 240mm²

Spare blanking plate for unused meter ways in metering enclosure			EM96BP

¹⁾ Suffix 'M' indicates cut-outs for meters and hinged door for outgoing metering suitable for left and right hand applications. Can be used with side mounted cable extension boxes if required

* MID version see page 82

EPBN1SPD123

Transient voltage surge suppression units, externally mounted in own enclosure

- See page 86 for full technical specification
- Includes 63A TP NZM1 MCCB for protection/isolation
- See page 133 for dimensions

Description	Eaton list number
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes III and IV in accordance with IEC 62305	EPBN1SPD123
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes I, II, III and IV in accordance with IEC 62305	EPBN1SPD1234

EPBKEL800

Earth leakage protection

- Kit comprises 350mm high extension box fitted with earth leakage relay, core balance transformer, all cables/terminals/protection fuses, and 230V shunt trip (for tripping of incomer device). Requires 4-pole incomer device. 630A maximum rating
- Sensitivity adjustable from 30mA to 5A. Time delay adjustable from 0.02 to 5 seconds

Description	Eaton list number
Earth leakage protection add-on kit for incomer device	EPBKEL800

Cable size summary

Incoming cables

MCCB or switch disconnecter size max/type	2 x 300mm ² /M10 bolt
Direct connection lugs incomer	M12
Neutral	M12
Earth	M10

Outgoing cables

NZM2 MCCB size max/type	185mm ² /cable clamp
NZM1 MCCB size max / type	70mm ² /cable clamp. (95mm ² can be fitted depending on cable manufacturer)
Neutral size max / type	50mm ² tunnel terminals and 4 x M8 bolts
Earth size max / type	50mm ² tunnel terminals and 8 x M8 bolts

Specification

- Panelboards to IEC61439-2. Form 3b Type 2
- Form 3b Type 2 - with finger guards fitted
- Busbar system KEMA certified 50kA Icc, Icw 50kA 1s
- Enclosure degree of protection IP3X (wall-mounted)
- Outgoing MCCBs to IEC60947-2. kA ratings shown are Ics=Icu at 400V ac
- Incoming MCCB/circuit breaker switch to IEC60947-2 Icu 50kA, Ics 25kA

Features

- 8, or 12 outgoing TP ways
- Outgoing devices; these panelboards utilise three frame sizes of MCCB: NZM3 250A–400A, NZM2 125A–250A TP, and NZM1 SP 16A–125A or TP 20A–160A
- Tin-plated busbars
- Can be configured for incomer device at top of panelboard
- Removable side gland plates as standard
- Wide range of extension boxes, metering, surge protection, and earth leakage incomer options available
- Door lock included

See pages 151-153 for dimensions.

EPBN31280

- Minimum ordering requirement: panelboard + incoming device + incomer connection kit + outgoing devices + blanking plates

Plug-in incoming metering

When configuring panelboard incoming metering, simply identify panelboard and incomer type, then order the following modules detailed in the selection chart below-

1. Incoming meter connection kit
2. Incoming meter enclosure
3. Meter
4. Voltage supply to meter tap-off kit
5. Top or bottom mounted cable extension box (When necessary see note)

Plug-in connectivity is provided between meter, CT and supply.

Incoming metering can be configured with outgoing metering.

¹⁾When incoming meter enclosure is fitted at the feed end of the panelboard there is no need for a cable extension box

Meter

Meter is available with pulsed and modbus outputs.
Simply installed with 2 locking screws.

Incoming meter enclosure

250mm high enclosure with hinged front door.
Simply bolted to the top or the bottom of the panelboard.

Supply tap-off

Provision to fit tap-off to either the left and/or right hand side of the pan assembly.
Only 1 per panelboard is required but provision to fit two is an option.

Incoming metering connection kit

This includes all copper connectors, CT, shielding and CT to meter cable. Can be top or bottom fed.

This does not include the incoming device, which has to be ordered separately.

Cable extension box (when necessary)

250mm high enclosure, fitted incoming end.

When incoming meter enclosure is fitted at the feed end of the 400A/630A/800A boards there is no need for a cable extension box.

5.7

Memshield 3 MCCB panelboards and associated devices

Plug-in outgoing metering

When configuring panelboard outgoing metering, simply identify panelboard and number of outgoing breaker type, then order the following modules detailed in the selection chart below:

1. Outgoing CT kit
2. Outgoing side mounted meter extension box
3. Meter
4. Voltage supply to meter tap-off kit
5. Extra long meter to meter voltage linking kit to feed to meter extension box on other side of panelboard if necessary
6. Extra long CT to meter linking cable if required
7. Three phase splitter box to allow separate monitoring of a three phase current transformer on individual energy meters if required

Plug-in connectivity is provided between meter, CT and supply.

Outgoing metering can be configured with incoming metering.

NZM2 – 250A max
NZM3 – 400A max

Outgoing side mounted meter extension box

Can be fitted on the left and right
hand side of the panelboard.
All outgoing meter apertures, except one,
have removable blanking shields fitted.

Three phase splitter box

Allows for separate monitoring of
a three phase current transformer
on individual energy meters

Supply tap-off

Provision to fit tap-off to either the left and/or right hand side of the pan assembly.
Only 1 per panelboard is required but provision to fit two is an option.

Extra long CT to meter linking cable

Required when CT is fitted on opposite side to meter extension box. 2.5m long.

Extra long meter to meter voltage linking kit

Required when:
Incoming and outgoing metering on one side = 1 off
Outgoing metering on both sides = 2 off
Incoming and outgoing metering on both sides = 3 off
2m long

In order to enable designers, specifiers, and installers to comply with surge protection requirements in BS 7671 - IET Wiring Regulations - 17th Edition (Section 534), these combined lightning arrester and surge suppression devices have been developed specifically for applications with MCCB panelboards ensuring outstanding product performance for all sensitive, mission critical and general purpose loads. Providing protection from direct and indirect lightning strikes, the IEC 61643 tested devices have impressive voltage protection levels (U_p), nominal discharge current $(8/20) \mu s I_n$ & maximum discharge current I_{max} for transient surge suppression, combined with impulse current $I_{imp} (10/350) \mu s$ for lightning strike protection. These devices are fully compliant with BS EN 62305.

EPBN1SPD123 technical summary:

- For the protection of low voltage distribution systems against transient overvoltage caused by direct and indirect lightning strike and switching operations.
- Application according to IEC 60364-5-53 Clause 534.
- Test class I, II, III in accordance with IEC 61643-1.
- SPD-type T1, T2, T3 in accordance with EN 61643-11.
- Lightning protection classes III and IV in accordance with IEC 62305.

EPBN1SPD1234 technical summary:

- For the protection of low voltage distribution systems against direct lightning strike into the overhead power supply line or external lightning protection system and against indirect lightning strike and switching operations.
- Application according to IEC 60364-5-53 Clause 534.
- Test class I, II, III in accordance with IEC 61643-1.
- SPD-type T1, T2, T3 in accordance with EN 61643-11.
- No discharge of ionised gases during operation.
- Lightning protection classes I, II, III and IV in accordance with IEC 62305.

EPBN1SPD123

MCCB pan assemblies, interiors, three phase, with earth & neutral bars

- Eaton MCCB pan assemblies offer a high degree of flexibility, suitable for inclusion in other factory built assemblies and as replacements for panelboard interiors.
- For incoming and outgoing device compatibility see associated panelboard details.

See pages 155-156 for dimensional drawings

Eaton's 4-pole panelboard system combines highest levels of electrical safety in a late stage with increased efficiency and reduced downtime thanks to system components available off the shelf.

Memshield 4 is cost effective, customizable and optimized to speed up change-over time and the fitting of additional circuits.

High levels of separation and compartmentalisation enabling increased operator safety. Design and layout are perfectly coordinated with the existing Memshield 3 panelboard range.

Meeting the true spirit of the requirements acc.to BS EN 61439-2.

6.1	INCOMING DEVICE RATINGS UP TO 400A - OUTGOING DEVICE RATINGS UP TO 250A	87
6.2	INCOMING DEVICE RATINGS UP TO 800A - OUTGOING DEVICE RATINGS UP TO 400A	91
6.3	EXTENSION BOXES AND RELATED ACCESSORIES / SURGE SUPPRESSION AND EARTH LEAKAGE PROTECTION UNITS	95
6.4	INCOMING / OUTGOING METERING EQUIPMENT - DIGITAL / MCCB PAN ASSEMBLIES	96

Specification

- Panelboards acc.to BS EN 61439-2
- Panelboard is supplied as Form 4 Type 6 group mounted
- 4-pole fully shrouded IPXXB plug-in busbar assembly
- Busbar system DEKRA certified at Icu 50kA / 1s
- Enclosure degree of protection IP3X (wall-mounted)
- MCCBs acc.to IEC/EN 60947-2
- Switch disconnectors acc.to IEC/EN 60947-3

See pages 157-160 for dimensions.

Features

- 8, 14 or 18 outgoing ways
- Efficient design enables multiple number of outgoing options (SPN, TPN, 4P)
- Standard off the shelf circuit breakers fit to the assembly
- Outgoing devices: these panelboards utilise two frame sizes of MCCBs: NZM2 125-250A TPN/4P, NZM1 SPN 16-125A and/or TPN/4P 20-160A
- Easily reconfigurable to meet fully compartmentalised approach either Form 4 / Type 2 or Form 4 / Type 6
- The design suits for top or bottom (as standard) incomer configuration
- Removable end rails and gland plates for better access during installation
- Wide range of extension boxes, plinths, metering, surge protection and earth leakage incomer options available
- Provision for line side connection for sprinkler systems

EM4PB840

Minimum ordering requirement: Panelboard + incoming device + incomer connection kit + feeder adapters + outgoing devices + blanking modules and associated components for Group Mounted or Compartmentalised

Memshield 4 MCCB 4-pole panelboards and associated devices

Incoming device ratings up to 400A - outgoing device ratings up to 250A

Exploded view of new panelboard approach incl. accessories

Specification

- Panelboards acc.to BS EN 61439-2
- Panelboard is supplied as Form 4 Type 6 group mounted
- 4-pole fully shrouded IPXXB plug-in busbar assembly
- Busbar system DEKRA certified at I_{cw} 50kA / 1s
- Enclosure degree of protection IP3X (wall-mounted)
- MCCBs acc.to IEC/EN 60947-2
- Switch disconnectors acc.to IEC/EN 60947-3

See pages 157-160 for dimensions.

Features

- 6, 12 or 16 outgoing ways
- Efficient design enables multiple number of outgoing options (SPN, TPN, 4P)
- Standard off the shelf circuit breakers fit to the assembly
- Outgoing devices: these panelboards utilise three frame sizes of MCCBs: NZM3 250-400A TPN/4P (fixed position, lower left/right), NZM2 125-250A TPN/4P (completely variable), NZM1 SPN 16-125A and/or TPN/4P 20-160A (completely variable)
- Easily reconfigurable to meet fully compartmentalised approach either Form 4 / Type 2 or Form 4 / Type 6
- The design suits for top or bottom (as standard) incomer configuration
- Removable end rails and gland plates for better access during installation
- Wide range of extension boxes, plinths, metering, surge protection and earth leakage incomer options available
- Provision for line side connection for sprinkler systems

Accessories - Compartmentalised approach

Description	Eaton list number
Blanking plate NZM1 SPN	EM4PBCKN12BK
Blanking plate NZM1 TPN / 4-pole	EM4PBCKN14BK
Blanking plate NZM2 TPN / 4-pole	EM4PBCKN24BK
Blanking plate NZM3 TPN / 4-pole	EM4PBCKN34BK

EM4PB68SXB

Cable extension boxes - side mounted

Description	Eaton list number
To fit 6/8-way panelboard EM4PB680 / EM4PB840	EM4PB68SXB
To fit 12/14-way panelboard EM4PB1280 / EM4PB1440	EM4PB1214SXB
To fit 16/18-way panelboard EM4PB1680 / EM4PB1840	EM4PB1618SXB

EM4PB250EX

Cable extension box - top/bottom mounted

Description	Eaton list number
250mm high	EM4PB250EX

EM4PB250EXDIN

DIN-rail extension box - top/bottom mounted

Description	Number of 18mm modular units	Eaton list number
250mm high - for housing DIN rail mounted command/control equipment like timers, contactors, etc.	2 banks of 15 (30 in total)	EM4PB250EXDIN

EM4PB300CX

Corner filler box - top/bottom mounted

Description	Eaton list number
250mm high / 300mm wide - for use where top/bottom or meter extension boxes are fitted in conjunction with cableways on the sides	EM4PB300CX

EM4PB100PL

Plinth options - bottom mounted

Description	Eaton list number
100mm high - for entire panelboard range	EM4PB100PL
100mm high / 300mm wide - for use where plinth option is fitted in conjunction with cableways on the sides	EM4PB100PLCX

EM4PBLE

Lifting eye kit

Description	Eaton list number
Set of 2 pieces mounted on the top of the panelboard	EM4PBLE

Transient voltage surge suppression units, vertical mounted either next to main incomer or inside cable extension box (lateral)

- Includes all necessary cables and connections to install the SPD. However it DOES NOT include the 4 Pole 63A NZM1 MCCB and Feeder Adaptor - which MUST BE ordered separately

Description	Eaton list number
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes III and IV in accordance with IEC 62305	EM4PBSPD34
SPD-type T1, T2, T3 in accordance with EN 61643-11, lightning protection classes I, II, III and IV in accordance with IEC 62306	EM4PBSPD1234

EM4PBKEL404

Earth leakage protection

- Kit comprises an adjustable Earth Leakage relay, CT and UVR to suit the incoming MCCB and associated connection cables / terminals
- Sensitivity adjustable from 30mA to 5A. Time delay adjustable from 0.02 to 5 seconds

Description	Eaton list number
Earth leakage protection add-on kit for 400A / 4-pole incomer	EM4PBKEL404
Earth leakage protection add-on kit for 800A / 4-pole incomer	EM4PBKEL804

Live side connection kit

- Kit for enabling the connection of cables to feed an externally mounted switch-disconnector-fuse to the live side of the incoming device for sprinkler circuits

Description	Eaton list number
Live side connection kit for 400/800A MCCB incoming device	EM4PBLSC

EM4PB250EXM

Incoming / outgoing metering equipment - digital

EM4PB68SXM

Description	Number of meter spaces in metering enclosure	Number of meter blanking plates included	Eaton list number
Incoming meter extension box - top/bottom mounted - 250mm high (meter not included)	1	0	EM4PB250EXM
Outgoing meter extension box - side mounted - to fit 6/8-way panelboard EM4PB680 / EM4PB840	6	5	EM4PB68SXM
Outgoing meter extension box - side mounted - to fit 12/14-way panelboard EM4PB1280 / EM4PB1440	8	7	EM4PB1214SXM
Outgoing meter extension box - side mounted - to fit 16/18-way panelboard EM4PB1680 / EM4PB1840	10	9	EM4PB1618SXM
Outgoing CT Kit (1 off required per metered outgoing TP way) to suit NZM1 frame MCCBs. 160A maximum rating. Includes CT to meter plug-in cable and meter to meter voltage supply linking cable with connectors			EM4PBCTMT160
Outgoing CT Kit (1 off required per metered outgoing TP way) to suit NZM2 frame MCCBs. 250A maximum rating. Includes CT to meter plug-in cable and meter to meter voltage supply linking cable with connectors			EM4PBCTMT250
Outgoing CT Kit (1 off required per metered outgoing TP way) to suit NZM3 frame MCCBs. 400A maximum rating. Includes CT to meter plug-in cable and meter to meter voltage supply linking cable with connectors.			EM4PBCTMT400
Voltage supply to meter tap off kit (includes protection fuses), one per panelboard required, irrespective of number of meters			EM4PBVT
Meter includes both Modbus and Pulsed outputs (MID certified) Multifunction meter measuring parameters: Voltage (P-P / P/N) (individual/average) Current (I1, I2, I3) (individual/average) Frequency Power factor (individual/average) Active, reactive, apparent power (individual/total) Active, reactive, apparent energy (total)			EMC3P-P2P1
Multifunction meter - as above but NOT MID certified			EPBMETER1
Three phase splitter box to allow separate monitoring of a three phase current transformer on individual energy meters			EPBCTMT3P
Extra long (2m) meter to meter voltage supply linking cable with connectors			EPBN3LKKTm
Extra long (2.5m) CT to meter plug-in cable			EPBN3LKRJ45
Spare blanking plate for unused meter ways in metering enclosure			EM96BP

EM4PBP680

MCCB pan assemblies

- Eaton MCCB pan assemblies offer a high degree of flexibility, suitable for inclusion in other factory built assemblies and as replacement for panelboard interiors.
- For incoming and outgoing device compatibility see associated panelboard details.

Description	Current rating (A)	No. of outgoing ways based on NZM1 TPN/4P group mounted *)	Eaton list number
Memshield 4 panelboard pan assembly 400A, 8-way, outgoing up to 250A	400	8	EM4PBP840
Memshield 4 panelboard pan assembly 400A, 14-way, outgoing up to 250A		14	EM4PBP1440
Memshield 4 panelboard pan assembly 400A, 18-way, outgoing up to 250A		18	EM4PBP1840
Memshield 4 panelboard pan assembly 800A, 6-way, outgoing up to 400A	800	6	EM4PBP680
Memshield 4 panelboard pan assembly 800A, 12-way, outgoing up to 400A		12	EM4PBP1280
Memshield 4 panelboard pan assembly 800A, 16-way, outgoing up to 400A		16	EM4PBP1680

*) see Selection tool for permutations

Eaton’s MEM series products have earned a worldwide reputation for reliable high quality switch and fusegear – and above all market leading status.

Constantly updated and refined to comply with the very latest international standards, the market leading switchgear range, specialist heavy duty items and dedicated distribution and control equipment fulfils the diverse requirements of the contractor, specifier, OEM and distributor alike.

Note: A Glasgow Switch-Disconnector can be fitted with fuselinks to change it into a fuse-switch-disconnector

203GNC

Glasgow fuse-switch-disconnector

- Units are fitted with HRC Fuselinks of maximum rating but will accept fuselinks of a lower rating, refer to the HRC Fuselinks section on page 114.
- SPSN and TPSN indicate switched neutral.
- Neutral makes first and breaks last.

Nominal unit rating, Ie (A)	Eaton 415V fuse(s) fitted	Suitable fuselinks	Suitable copper switch links	Motor ratings AC23A Ue 415V kW	HP	Poles	Eaton list number

SPSN indicates switched neutral. ¹⁾20A units are DC22.

²⁾These units have dual fixings to accept AA0, BAO and OSD fuselinks. 2x M5 screws required

Maximum cable sizes are: 20A–6mm², 32A–10mm², 63A–35mm², 100/125A–70mm².

¹⁾ 1 required for switched neutral pole on SPSN switchfuses.

600MEB

Main earthing terminal bars

- Memform terminal bars are intended for the connection of circuit protective conductors, main bonding conductors and functional earthing conductors, etc., as referred to in IEE Wiring Regulation 542-04 (BS7671)
- A bolted link facilitates testing of earthing resistance
- Manufactured from solid hard drawn copper and mounted on painted steel supports complete with fixing holes and warning labels
- For ease of installation all terminals are captive
- Extra terminals are provided for supplementary bonding

Maximum incoming, I _e (A)	Size and number of terminals		Overall length mm	Overall width mm	Copper thickness mm	Eaton list number

These industrial bolted pattern fuselinks are of two types – with offset contacts of ratings 2–200A and with centre contacts of ratings 2–1250A.

They are available to BS references A1 to A4, B1 to B4, C1 to C3, D1 and in certain other sizes.

415V industrial fuselinks – centre bolted contacts

- Compact industrial bolted pattern fuselinks with centre contacts. ASTA 20 Certified or tested to BS EN 60269-1 (BS88-1) or BS88-2 for a breaking capacity of 80 kA at 415V a.c.

20SSD

**SSD type offset blade fuselinks**

- ASTA 20 Certified to BS EN 60269-1 (BS88-1) for a breaking capacity of 50kA at 240V a.c.
Also complies with BS7654 for use in street lighting cut-out.

315MJ30-7

**J type feeder pillar fuselinks**

- ASTA 20 Certified or tested to BS88 – 2 (formerly BS88: Part 5) for a breaking capacity of 80 kA at 415V a.c.
- Available in standard 82mm and 92mm fixing centres up to 400A and 800A respectively for wedge tightening contacts. Also available in ferrule form up to 250A for pole mounted cut-outs.
- For use by the Electricity Supply Industry in distribution systems.
- Available with silver elements, details on request.

Since the late 1920's we have built countless motor starters, fitted and trusted by generations of contractors, while the increasing requirements of our markets have led us to constantly update and expand our ADS range to allow for an increased choice of current ratings and ingress protection.

9.1

ADS8 AC CONTACTORS, STARTERS AND ASSEMBLIES 119

This chapter covers the ADS8 range of DOL, DOL Reversing and Star Delta starters with associated overload relays. Overload relays are supplied separately and enclosures are IP54 metal clad. A higher rated IP65 moulded 9kW DOL starter is also available.

- IEC / EN60947-4

See page 125 for overload relays.

See page 179 for trip and electrical life curves.

See page 172 for dimensional drawings.

18mm miniature circuit breakers (MCBs), technical data

Eaton's range of 10/15kA high performance miniature circuit breakers (MCBs) are manufactured and tested to IEC EN 60898, and IEC EN 60947-2, meeting the latest UK, European and international standards, with ratings from 1A to 63A as standard.

DIN rail mountable and suitable for use with both pin and comb type busbar systems, Eaton's MCBs are suitable for use on 230/400 VAC systems and are calibrated for use at 40°C. These devices suite with the other modular devices including RCBOs, RCCBs and isolators, for use within Eaton Memshield 3 Distribution boards and a wide range of other applications.

The Eaton MCBs are fitted with box clamp terminals suitable for use with cables up to 25mm², and have a unique box clamp barrier to prevent incorrect cable insertion.

Eaton miniature circuit breakers are available with B, C and D characteristic curve as standard. Type C MCBs are most commonly used in commercial and general applications where there are lighting or motor loads involving high switching surges that may cause unwanted operation of type B devices. Type D devices are more commonly used on general industrial applications with much higher inrush surges.

IEC/EN 60898 Type	Instantaneous Trip Current ($\times I_n$)	Typical Application	Eaton 10/15A MCB type
B	3 to 5	General distribution	EMBH
C	5 to 10	Commercial Light industrial	EMCH
D	10 to 20	General Industrial	EMDH

Type B: Suitable for general, domestic and commercial installations having little or no switching surges.

Type C: Suitable for general use in commercial or industrial applications where the greater use of fluorescent lighting and small motors can produce switching surges, which may cause nuisance tripping of type B breakers.

Type D: Suitable for general industrial applications where there are a lot of high inrush switching surges associated with equipment such as transformers, large motors, welding and X ray equipment.

Earth fault loop impedances (Z_s) to provide compliance with BS 7671

The wiring regulations BS 7671 makes specific reference to MCB types and the maximum earth loop impedance allowable to meet the required disconnection times.

It can be seen that it is much easier to achieve adequate disconnection times with type B devices than it is with types C and indeed type D devices.

Maximum earth fault loop impedance i.e. Z_s ohms for final circuits fed from miniature circuit breakers MCBs or RCBOs with U_o of 230V, for instantaneous operation giving compliance with 0.4s disconnection time of Reg 411.3.2.2 and 5s disconnection time of 411.3.2.3

Note: A minimum Voltage factor $C_{min} = 0.95$ has been introduced to take account of variations in supply voltage depending on time, place and transformer settings etc., in accordance with Electricity Safety, Quality and Continuity regulations 2002.

The effect of this is to reduce the previous BS7671 maximum earth loop impedance Z_s values by 5%.

Tripping characteristic type B, C & D

27mm style miniature circuit breakers (for 250A distribution boards)

Eaton's 27mm style miniature circuit breakers (MCBs) are manufactured and tested to IEC EN 60947-2, meeting the latest UK, European and international standards, with ratings from 20A to 125A single and triple pole as standard.

Eaton's MCBs are suitable for use on 230/400 VAC systems and are calibrated for use at 40°C. and are available with B, C, and D characteristic curve, with breaking capacities up to 25kA.

Residual current circuit breakers (RCCBs) technical data

Eaton's range of residual current circuit breakers without integral Overload protection (RCCBs), are manufactured to IEC EN/61008 and meet the latest European and International standards.

DIN rail mountable in 2 and 4 module widths these RCCBs provide protection solutions to a wide range of applications. With standard thermal ratings of 16A to 100A and trip sensitivities of 10mA, 30mA, 100mA and 300mA, these devices can be equipped with a range of modular accessories.

The Eaton RCCBs suite with the complete range of modular devices, and are for use within Eaton's Memshield 3 distribution boards and other applications.

These devices will accommodate cables up to 35mm².

Terminology

RCD – Residual current device:- This is the generic term covering a range of devices that are able to detect residual currents sometimes also referred to as earth leakage current. The residual current is measured by detecting the difference between the current flowing in the live and neutral conductors of a circuit and where the residual current is above a predefined level the RCD will trip. RCDs are available in a range of trip sensitivities for different applications.

RCCB – Residual current circuit breaker is an RCD which will cause disconnection of the electrical supply should it detect a residual current passing through the device, above a specified tripping current limit e.g. 30mA. This device does not provide over current protection and is therefore also referred to as an RCCB without integral over-current protection.

RCBO – Residual current circuit breaker, with overload protection, is an RCCB which will cause disconnection of the electrical supply should it detect a residual current above a specified tripping current limit, combined with integral overload, over-current, and shortcircuit protection associated with a miniature circuit breaker.

The 17th Edition of the IEE wiring regulations BS7671 has placed much greater emphasis on the use of 30mA RCDs to provide "additional protection" in many areas covered by the regulations, such as circuits feeding socket outlets and for the protection of concealed wiring.

Trip sensitivities

10mA – Provides the highest degree of RCD protection in hazardous environments where supplementary protection against electric shock is required. This very high sensitivity should only be applied to final circuits where a high degree of risk exists.

30mA – Provides a high degree of protection against electric shock due to direct and indirect contact. A 30mA RCD will trip within 40ms when a fault current of 150mA is detected.

This type of RCD is required to satisfy the requirements for "additional protection" in accordance with BS7671 (IEE wiring regs.)

100mA – Provides a degree of protection against electric shock resulting from indirect contact, and is generally used to protect a group of circuits as well as providing overall protection against Fire risk.

300mA – Provides a lower level of RCD protection in the form of an overall protection against the risk of fire resulting from faults in electrical wiring etc.

Residual current circuit breakers – with overload protection (RCBOs) technical data

Eaton's range of residual current circuit breakers with integral overload protection (RCBOs), are manufactured to IEC EN 61009 and meet the latest European and International standards.

Trip Sensitivity

Provides a high degree of protection against electric shock due to direct contact. A 30mA RCD will trip within 40mS when a fault current of 150mA is detected.

This type of RCD is required to satisfy the requirements for "additional protection" in accordance with BS7671 (IET wiring regs.)

Electric Fire Protective Device, Arc Fault Protection AFDD⁺, 2-pole

Detects and quenches arc faults in final circuits

- Fully combined with residual current circuit breaker (RCCB) and miniature circuit breaker (MCB)
- Safely detects arcs in cable length up to 70 meter
- Variable installation of N either left or right
- Rated currents from 10 to 40 A
- Tripped indication: MCB, RCCB or AFDD
- LED indication for arc faults
- Permanent self-monitoring
- Overvoltage and overheat monitoring
- 3-position DIN rail clip, permits removal from existing busbar system
- 30 mA rated residual currents
- Tripping characteristics B, C
- Rated breaking capacity up to 10 kA

- 3 phase 3 or 4 wire system.
- Liquid crystal display with backlight. 4 lines, 4 digits per line to show electrical parameters. 5th line, 8 digits to show energy. Bar graph for current indication as percentage of CT rating.
- 96 x 96mm panel mount, 55mm rear panel.
- Modbus comms & pulse output.
- Fast installation plug-in cabling for current and voltage inputs. Feed-through voltage supply capability.
- Phase sequence detection and correction capability.
- Multifunction meter measuring parameters:
 - Voltage (P-P / P-N) (individual/average)
 - Current (I1, I2, I3) (individual/average)
 - Frequency
 - Power factor (individual/average)
 - Active, reactive, apparent power (individual/total)
 - Active, reactive, apparent energy (total)
- Display scrolling selectable for automatic or manual.

- Meter is self-powered from voltage supply. Auxiliary voltage supply not required.
- Front panel indicator when Pulse Output or Comms operates.

The range of meter is a class 1 multi-function, panel mounting meter to measure electrical parameters on LV supplies to The meter is a Class 1 multi-function, panel mounting meter to measure electrical parameters on LV supplies to and from TP&N distribution boards. It is ideal for applications such as:

- Energy monitoring.
- Power factor analysis.
- Supply capacity.
- Building regs part L2.
- Building performance.
- Environmental standards e.g. IS14001, EMAS, ECA.
- Climate change levy.
- Carbon trading.
- Carbon footprints.

The six dedicated buttons are labelled as V, I, VAF, PF, P, E. The parameters available by pressing each key are detailed below:

Measurements available via:

Button 1 (V)	Line to neutral voltage of three phase and average line to line voltage
	Line to line voltage of three phase and average line to line voltage
Button 2 (I)	Phase current of three phase and average phase current.
	Phase current of three phase and maximum phase current.
Button 3 (VAF)	Voltage, current, power factor of first phase and frequency
	Voltage, current, power factor of second phase and frequency
	Voltage, current, power factor of third phase and frequency
	Average value of voltage, current, power factor of three phase and frequency
Button 4 (PF)	Power factor of three phase and average power factor
Button 5 (P)	Active power of three phase and total active power
	Reactive power of three phase and total reactive power
	Apparent power of three phase and total apparent power
	Active, reactive, apparent power and power factor of first phase
	Active, reactive, apparent power and power factor of second phase
	Active, reactive, apparent power and power factor of third phase
	Total active, reactive, apparent power and average power factor of three phase
	Maximum active power demand, reactive power demand, apparent power demand
Button 6 (E)	Minimum active power demand, reactive power demand
	Active energy of three phase
	Apparent energy of three phase
	Reactive energy of three phase

Accuracy

Measurement	Accuracy
Voltage VL-N	± 0.5% of full scale
Voltage VL-L	± 0.5% of full scale
Current	± 0.5% of full scale
Frequency	± 0.1% For voltage >20V L-N For voltage >35V L-N
Active power	Class 1
Apparent power	Class 1
Reactive power	Class 1

Measurement	Accuracy
Power factor	± 0.01
Active energy	Class 1
Apparent energy	Class 1
Reactive energy	Class 1
MAX / MIN active power	Class 1
MAX / MIN reactive power	Class 1
MAX apparent power	Class 1

800	2,500	500	3,000

Glasgow parallel cable connection & copper terminal plate

Parallel cable connection

A = 803GNC

B = 6PCB

C = 90CSB

An 802GCC (copper connection piece) is required in addition to switch enclosure for parallel cable connection.

Copper terminal plate

Each copper terminal plate has 1-M16 x 50mm bolt, nut and washers for single hole sockets. 4-M10 tapped holes are also provided for 4 hole sockets or solid copper.

Busbar chambers

Eaton's busbar chamber system is designed for wall-mounting installations. All units in the range share the same height and depth dimensions. Similarly the twin busbars are located in precisely the same positions throughout the range and vary in size only in their front-to-back dimensions according to rating. Detachable end plates enable all units to be extended by coupling to a second busbar chamber using extension sets.

AC motors, 3 phase full load current table, 1450rpm approx.

Provided as a guide to the selection of suitable Eaton control gear

The tables are based on motors of approx, 1450 rpm of average efficiency and power factor. Motors of higher speed than 1450 rpm usually take a lower current than that shown in the table; while motors of lower speed usually take higher current. Wide variations from these figures can arise, especially on single phase motors and engineers should, whenever possible, determine the actual full load current (F.L.C.) from the motor rating plate in each case

Motor rating kW	Approx F.L.C. at line voltage				
	220V	240V	380V	400–415V	550V
0.07	–	–	–	–	–

Enclosed motor, heating and lighting control

9kW DOL starter without switch disconnect, IP 65 moulded surface mounting enclosure, dimensional drawings

11kW DOL starter without switch disconnect, IP 54 metalclad surface mounting enclosure, dimensional drawings

- Dimensions in brackets refer to type **2528ADS(2X)** size enclosure

11kW DOL starter without switch disconnect, IP 54 metalclad surface mounting enclosure, dimensional drawings (contd)

11kW DOL starter with switch disconnect, IP 54 metalclad surface mounting enclosure, dimensional drawings

11kW DOL starter without switch disconnect, moulded & metal surface mounting enclosure, wiring diagrams**A. Three phase motors-DOL starter. Local 3-wire (pushbutton) control.****B. Single phase motors-DOL starter. Local 3-wire (pushbutton) control.**

Coil phase to neutral: remove connector Y, connect Neutral to A1

Separate coil supply: remove connectors Y and Z, connect coil supply to A1 and 96.

Coil voltage: Ensure correct voltage coil is fitted for separate coil supply and phase to neutral applications.

External interlock: Remove connection Z and insert interlock between 5 and 96.

Alarm circuit: At trip an alarm signal voltage equal to the coil voltage is available between 98 and A1 when a link is added between 96 & 97. The switch is rated at 440VA, 500V maximum.

Control circuit fuses (10A MAX).

Coil connected Phase to neutral (1 fuse): remove connector Z and connect fuse between 5 and 96.

Coil Connected Phase to Phase (2 fuses): remove connector Z and connect fuse between 5 and 96. Remove connector Y and connect fuse between 1 and A1.

Note: the voltage rating of the fuse(s) must be suitable for the control circuit voltage.

Short circuit protection: Maximum sizes of fuses or MCB's to give short-circuit protection to this starter are tabulated on page 173.

To reverse direction of rotation (3-Phase Motors): Interchange any two supply lines 1, 3 or 5.

10.5 Technical data

Degrees of protection – IP

The degrees of protection against ingress of foreign bodies and liquids are indicated by the first two characteristic numerals as detailed in tables 1 and 2. For switch and control gear the classification is recognised internationally and is described in detail in BS EN 60529.

First number

Protection against solid foreign objects IP	Requirements	Meaning protection of persons against access to hazardous parts with:
0	No protection	non-protected
1	Full penetration of 50mm diameter sphere not allowed. Contact with hazardous parts not permitted	back of hand
2	Full penetration of 12.5mm diameter sphere not allowed The jointed test finger shall have adequate clearance from hazardous parts	finger
3	The access probe of 2.5mm diameter shall not penetrate	tool
4	The access probe of 1.0mm diameter shall not penetrate	wire
5	Limited ingress of dust permitted (no harmful deposit)	wire
6	Totally protected against ingress of dust	wire

Second number

Protection against harmful ingress of water IP	Requirements	Meaning protection from water
0	No protection.	non-protected
1	Protected against vertically falling drops of water – limited ingress permitted	vertically dripping
2	Protected against vertically falling drops of water with enclosure tilted 15° from the vertical – limited ingress permitted	dripping up to 15° from the vertical
3	Protected against sprays to 60° from the vertical – limited ingress permitted	limited spraying
4	Protected against water splashed from all directions – limited ingress permitted	splashing from all directions
5	Protected against low pressure jets of water from all directions – limited ingress permitted	hosing jets from all directions
6	Protected against strong jets of water – limited ingress permitted	strong hosing jets from all directions.
7	Protected against the effects of immersion between 15cm and 1m	temporary immersion
8	Protected against long periods of immersion under pressure	continuous immersion

Additional letter

(Optional) IP	Requirements	Meaning protection of persons against access to hazardous parts with:
A for use with 0	Penetration of 50mm diameter sphere up to guard face must not contact hazardous parts.	back of hand
B for use with 0 & 1	Test finger penetration to a maximum of 80mm must not contact hazardous parts.	finger
C for use with 1 & 2	Wire of 2.5mm diameter x 100mm long must not contact hazardous parts when spherical stop face is partially entered.	tool
D for use with 1, 2 & 3	Wire of 1.0mm diameter x 100mm long must not contact hazardous parts when spherical stop face is partially entered.	wire

Note: Limited penetration allowed with all four additional letters.
