product description

MV500 protective barrel glass, without filter, long

protective barrel for lens with exchangeable front panel made of glass, large version

MV500 protective lens barrel glass long Degree of protection IP67 for MV500 devices face plate: glass enclosure: metal For lens length without/with built-in ring light 83.5 mm/59.1 mm For lens width without/with built-in ring light 60.4 mm/41.6 mm Suitable for lenses (MLFB): 6GF9001-1BL01,...-1BF01, ...- 1BG01, ...- 1BH01,...- 1BJ01 ...-1BK01 Suitable luminaires (MLFB): 6GF3540-8DA33, ...8DA41, ...8D42; WxHxD (outer, mm) 65x65x101 Scope of delivery: Protective barrel with mounted O-ring and pane;

suitability for use

for lenses up to 90 mm in length

suitability for operation

for MV500 with lens 6GF9001-1BK01, 6GF3540-8EA05-0LL0

mechanical data

material

Aluminum/glass

color

black

ambient conditions

ambient temperature

- during operation
- during storage
- during transport

0 ... 50 °C
-30 ... +70 °C
-30 ... +70 °C

design, dimensions and weights

height

100 mm

diameter

65 mm

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
