

product type designation

product description

Floodlight 40x30cm, 24V

external floodlight, white

MV500 LED panel, diffuse white Illuminated area: 40 cm x 30 cm; lighting distance: 0mm..2000 mm; illuminant: LED 850 Nm; Degree of protection IP67; For SIMATIC MV500 external, 24 V power supply; lamp holder: 6GF3500-8CD dimensions: 420x 340x 22 mm (WxHxD) scope of delivery: panel light and 10m cable M16-open end; scope of delivery: panel light;

suitability for use

Switching mode via MV500-STROBE signal, no flash mode

suitability for operation

for MV500

supply voltage, current consumption, power loss

type of voltage / of the supply voltage

DC

supply voltage / at DC

24 V

consumed current / maximum

5000 mA

power loss [W] / maximum

81 W

mechanical data

material

metal/PMMA

color

black

design, dimensions and weights

width

422 mm

height

340 mm

depth

22 mm

net weight

3900 g

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates,
