

PLASTIC TWO-WHEELED CONTAINERS

Straight has an extensive range of plastic wheeled containers suitable for a variety of applications, including the collection of recyclables, general, trade or clinical waste.

Our two-wheeled containers are available in a wide range of colours and sizes, from 120 litres through to 360 litres. All of our plastic two-wheeled containers are manufactured in the UK and are fully tested to the EN-840 standard.

Containers are supplied with multiple features as standard including a raised lid to ensure rainwater run off, a multi-purpose hinge and handle system for both tilting and pushing and a reinforced comb edge compatible with all standard lifting equipment.

Our wheeled containers also feature reinforced front and side walls for added strength to prevent possible deformation.

To maximise the flexibility of these products, we also offer modified wheeled containers with apertures, the Wheeled Container Housing and our innovative Wheeled Bin Inner Caddy.

Product	Capacity (litres)	W x D x H (mm)
Two-Wheeled	120	480 x 540 x 940
Two-Wheeled	140	480 x 550 x 1060
Two-Wheeled	190	525 x 630 x 1060
Two-Wheeled	240	575 x 730 x 1060
Two-Wheeled	360	580 x 875 x 1080
