

Kraftform Kompakt VDE

Size:	200x125x80 mm
Weight:	667 g
Country of origin:	CZ
Customs tariff number:	82054000

- VDE interchangeable blade with reduced shaft diameter
- Multi-component VDE-insulated Kraftform handle with anti-roll feature
- Ergonomic Kraftform handle for low-fatigue working
- In robust pouch
- Individually tested

14 VDE interchangeable blades with reduced blade diameter so that even low-lying screw and spring elements can be accessed and actuated. 817 VDE Kraftform handle for ergonomic working and single-pole phase tester in a robust belt pouch. Individually tested tools as per IEC 60900. Individual test at 10,000 volts for secure work at the permissible voltage of 1,000 volts.

Individually tested

Why is the right tool so often missing at the workplace? The reason: too many tools and overly-heavy tool bags can make it bothersome to carry keep them with you. So for us it was a clear challenge: to develop a tool that is suitable for a whole host of applications and can be easily taken along to the workplace. Our solution: Kraftform Kompakt tools. A handle into which blades with a range of different profiles can be inserted. Compactly and protectively housed in a light and robust textile pouch - and they are even VDE-tested, too.

Each Kraftform Kompakt VDE set has been tested individually at 10,000 volts, in accordance with IEC 60900. This ten-times-higher testing load guarantees safe working at their maximum permitted load of 1,000 volts.

VDE-insulated screwdriver with reduced blade diameter

Reduced blade diameter with integrated protective insulation, allows sunken screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.

Handle/interchangeable blade system

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

Kraftform Kompakt VDE

Easy exchange

Kraftform Kompakt VDE sets come with an insulated handle and insulated inter-changeable blades, that can be exchanged without any special tools.

Belt pouch

Storage and transport in a robust textile pouch, so the tool is well protected and always close at hand.

Multi-component handle

Wera produces the Kraftform handle out of several materials with different properties. A resistant plastic is used for the core which ensures that the blade is held securely even under high strain. A softer material is used for the coloured soft zones, which provides high frictional resistance and allows the transfer of high forces - resulting in less required screwdriving effort. The red sections with their hard surfaces prevent any "sticking" of the hand to the handle, making rapid repositioning of the hand possible.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.
