## MCB's

# Features &

# Benefits...

## **Clip in Devices**

The Elucian Protective Devices simply click onto the DIN Rail and can be secured with this locking mechanism. This means work can be carried out quicker and without dealing with tight spaces.

## **Lock Off Capabilities**

Lockout devices (available at Unicrimp®) are designed to attach to the moving part of the protective device, usually a switch toggle (rocker switch) which moves from the on to off position. This ensures the switch cannot be switched back on while work is being carried out

### **Clear Indication**

Each protective device has clear and visible trip indication along with clear product information which is easily visible whatever the switch position.

## **3 Year Product Warranty**

We take pride in leading the market and our 3 year warranty offers the best peace of mind available as standard today. It reflects the confidence we have in our products and the benefit of years of continuous engineering improvement.
