

# Introduction

The SureTrace™ Circuit Tracers are powerful, versatile, easy-to-use troubleshooting test tools for finding breakers and hidden wire problems in residential/commercial/industrial environments. These tracers work on closed (energized) and open (de-energized) circuits. They identify circuit breakers, find opens and shorts, and trace wires behind walls.

The tracers are available in three configurations. Each kit contains the same transmitter (TR-955) and test lead kit (TL-956). The 955 kit has a Receiver (RC-955) with an LED display, and a Hard Case (C-955). The 957 kit has a Receiver (RC-959) with a super-bright OLED display and a Hard Case (C-955). The 959 kit also has the high-end Receiver (RC-959), adds an Inductive Clamp (IC-958) with Battery Pack (BP-958), and a larger Hard Case (C-959).

## Key Features

- Numeric value and variable audible tone for easy-to-understand tracing
- Super-bright display for easy-viewing
- Peak detecting bar graph for instantaneous signal strength indication
- Identifies breakers and fuses
- Pinpoints opens and shorts
- Traces wires behind walls
- Can be used on de-energized/energized circuits from 0-600V AC/DC
- Will not affect GFCIs or other sensitive equipment on the line
- Low battery indication
- Cat III-600V safety rating
