

Straight Connection Joint

• Kit contains:	Clear shell, crimp connectors, earth braid, constant force springs, core separators, two part resin, sealing tape and gloves.
• Injection moulded cable joint shells:	Rigid and very strong, provides an excellent seal and prevents leakage of resin.
• Mechanical connectors	Machined brass connectors suitable for low voltage cables with copper or aluminium conductors.
• Earth Braid:	Continuity system providing good electrical contact and is insulated for extra protection.
• Constant force springs:	React to cable joint movement to maintain a good electrical contact.
• Core separators:	Provide safe separation of cable cores and mechanical connectors.
• Two part resin:	Provides excellent adhesion to PVC, XLPE, Polythene and paper cables. Detailed instruction sheet provided for cable jointing procedure.
• Application:	Suitable for use with both armoured and unarmoured cables up to and including 1kv.

Item No.	Cable Diameter (mm)	Shell Length (mm)	Shell Diameter (mm)
