### HASSLE-FREE, WIRE-FREE TOOTHBRUSH CHARGING

Using your electric toothbrush is great. But, unfortunately, charging it may not be.

Often people end up charging their toothbrushes in the kitchen or bedroom. The standard short cable means there is an added risk that the toothbrush will topple over.

Thousands of our customers have discovered how the TBcharge by ProofVision can transform their morning dental routine. Imagine having a toothbrush that is always charged and ready to go.

If you have a shaver socket, replacing it with our TBCharge is straightforward. We offer two replacement options; a charger only version or a charger with a shaver socket. Our twin charger is the perfect choice to keep your partner charged and happy when you renovate.

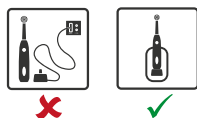

Our original in-wall charger for hassle free, wire-free toothbrush charging. Available in white plastic as standard with 3 optional front plate finishes to match your bathroom.
