Description

This modern wall PIR detector is a direct replacement for a standard 2 wire switch. Its slim fascia has concealed fixings. This sensor does not require a neutral connection so it can quickly replace an existing light switch. Works with a wide variety of load types including low energy CFL and LED lamps. Key features: Presence detection and lux level sensing – auto on, auto off Works with any type of lamp, including LED 2 wire (No neutral) Adjust time delay and lux settings via pots Suitable for lighting, heating or ventilation PDS-PRM - Key features of Basic Switching detectors include: Switching with lux level sensing (manual adjustment) Time delay function (manual adjustment)
