Guardlite 60W (PIR), Black, Prismatic Diffuser, PIR

Range Information

The Guardlite provides courtesy and security lighting with a choice of 110° PIR or dusk till dawn PC operating modes. The range offers a choice of lamps or LED option which offers long life and economical running. The all polycarbonate construction provides a hardwearing, UV stable unit; the shatterproof material and screw down diffuser helps prevent damage from vandals, our manufacturing process allows an exceptional IP65 ingress protection to be achieved resulting in longer installation life. Detectors within the fittings allow additional standalone lighting systems to be used, automatically switching on lighting once either motion (PIR) or the appropriate lux levels are reached (PC option).

Range Specification

- Easy to install.
- Day time walk test.
- Shatter-proof Polycarbonate construction.
- 110° PIR Option; Range of 12 Metres.
- Photocell Option.
- Weatherproof IP65.
- Total switching capacity (1000W).
- Designed to BS EN 60598.
