- Ideal for the safe disposal of contaminated sharp objects
- Material is non-toxic when incinerated
- Carries the British Standard Institute kite mark and the United Nations biohazard symbol
- Available in 1 Litre, 4 Litre and 7 Litre sizes

The **Sharps Disposal Box** is a rigid disposal container specially designed for the hygienic discarding of needle, syringes, lancets or clippers. Sharps should never be disposed of in normal waste bins as they usually carry body fluids that may cause injury and infection to yourself and others. Sharps disposal boxes should be incinerated every three months even if they aren't full.
