

Product Specifications

HypaClens Sterile Eye Wash Pods

- Emergency eye irrigation for any work environment
- 0.9% sterile saline solution is ideal for irrigating eyes
- Pods allow a small amount of eye wash to be used while maintaining the sterility of other pods
- Portable size ideal for use in sport and outdoor activity first aid kits
- 25 x 20ml pods

The **HypaClens Sterile Eyewash Pods** gently wash the eye and provide moisture-replenishing relief for eyes that have been contaminated with particles or liquids. Their 0.9% sterile saline solution is ideal for eye irrigation. The pack of 25 compact 20ml pods make a brilliant addition to first aid kits or cabinets and are highly recommended for any work environment. They are suitable for minor, non-emergency eye contamination when the use of a larger bottle would be wasteful. The strip format ensures that pods stay together when stored but can still be easily separated from one another when needed.
