"DAVE SAYS" QUALITY MAKES THE DIFFERENCE

CHOOSING THE DRAPER WATERING SYSTEM

Our water timers save the user time and hassle while also helping save money from their water bill. So with a choice of water timers to choose from, which water timer do you need?

A mechanical timer is perfect for simple hose and sprinkler setups or perforated irrigation hoses. Just set the run time and put your feet up, the water will switch itself off when the time's up.

Electronic timers are best suited for irrigation and drip watering systems. The ball valve timer is a good 'set and forget' system, ideal for morning and evening watering times and for when you're away on holiday and with a battery life of around 5 months. For the pros, the solenoid timer is your best bet, with a higher quality valve and extended battery life, the solenoid water timer delivers time and time again.

4 WTM1
MECHANICAL WATER TIMER

Single outlet mechanical water timer. Functions just like an egg timer with up to 120 minutes watering time. Fixes directly to tap and easily sets to turn water on/off while attached to the tap. Fitted with 3/4" hose connector and 3/4" BSP tap connector, ideally suited for use with perforated irrigation hoses and sprinklers. Display packed.

Stock No.
36748

5 WTBV1
ELECTRONIC BALL VALVE WATER TIMER

Single outlet electronic water timer, capable of delivering one or two watering sessions per day. Attached with a clear LCD screen for easy setup and operated by 2 x AA batteries (sold separately). Fitted with 3/4" hose connector and 3/4" BSP tap connector fixing directly on to the tap. Ideally suited for use with irrigation and sprinklers systems. Display packed.
