

Domestic Ventilation Fan Accessories Remote Humidistat & Timer

Model No. 1361

Key Features

Designed to operate the fan when the relative humidity reaches a pre-set level. The unit is adjustable between 20% (always on) and 90% (rarely on) relative humidity. The 1361 also has an integral timer adjustable between 1 and 45 minutes. Comes with a single pattress back box 20mm deep.

Dimensions

Humidistat:
86x86x23mm (HxWxD)
Single Pattress Back-Box:
86x86x20mm (HxWxD)

Technical Details

Single Phase 50Hz
220-240v - AC - 0.7A
Electrical Load: 20-200W
Material: ABS Thermoplastic

Important: A double pole switch must be used, having a contact separation of 3mm in all poles, and a fuse rated at 3A. The cable to the fan must have a minimum of 1 square millimetre cross section and should not exceed 2000mm in length, excessive length could possibly cause radio interference.

BEAB approved. CE certification.
