

## Product Specifications

## HypaGuard Training Manikin Resuscitation Face Shields on a Roll

- Provides a hygienic barrier during CPR training on a manikin
- Gives trainees a real life experience of using a face shield
- Suitable for training venues where multiple face shields are needed
- For training purposes only
- Latex free
- Roll of 36

The HypaGuard Training Manikin Face Shields on a Roll are the perfect product to help train large groups of people to do CPR on a training manikin. The roll makes the face shields easy to tear off and pass around so are a very cost effective solution for first aid trainers. The roll holds 36 latex free face shields.

Each sheet has a clear outline of where to place over the manikins face and step by step instructions for use.

The box has a perforated dispensing area so unused sheets stay in the box clean and ready to use.

The face shields are only for use on training manikins.
