Oil Containment Funnels

Oil safe, oil containment products designed to keep your workplace clean, safe and free from oil contamination.

Our new range of oil containment funnels has been designed to help organisations with oil and lubrication management. Using the system reduces the chances of dangerous accidental spillages and cross-contaminating lubricants which could cause machinery damage. The safe oil system utilises colour-coded products to help easily identify different lubricants instantly and helps prevent cross-contamination. The 1.4 litre capacity funnels have a top lid and spout cap to contain fluids during removal and replacement. The internal overhang rim creates an antisplash effect.

- 1.4 litre body capacity
- 4" / 100 mm dia. aperture
- 6" / 152 mm dia. inner (antisplash)
- Polyethylene body ~ polypropylene lid & cap
- Antisplash design
- Screw lid and spout cap seal airtight and prevent drips or spills during relocation
- Side handle
- Available in 4 distinct colours providing broad choice for easy and comprehensive segregation and identification of different oils: BLACK ~ BLUE ~ GREEN ~ RED
