

Frostfighter Multi Purpose Heater - 450W & 1kW

UHA05, UHA05LST & UHA10S

	Weight (kg)	Model No
450W	2.5	UHA05
450W with fan	2.9	UHA05LST
1kW with fan	2.9	UHA10S

Frostfighter Utility Radiant Heater

Splash proof, tough and very economical, designed specifically for use in locations such as lofts, boats, garages, caravans, toilets and cellars. All models incorporate full thermostatic control with frost protection setting, which can be set to operate when the ambient temperature falls below 5°C. They can either be used as a portable unit or permanently mounted in either a vertical or horizontal position. Additionally the UHA10S and UHA05LST have an independent fan to boost air circulation. The UHA05LST complies with Department of Health guidelines and has a maximum surface temperature of under 43°C making it suitable for use in areas such as disabled toilets.

- 450W or 1kW models
- Splash proof to IP24
- Variable thermostat with frost protection setting
- Robust construction
- Automatic safety cut-out
- Power-on neon indicator
- Fan only setting for air circulation on UHA10S and UHA05LST
- Fitted cable
- Finished in Barley White
