

FLUXX®-Dispensing Taps AH 23 The patented FLUXX®-Dispensing Taps for containers and drums are perfectly suitable for the simple, clean and quick decanting of fluids without gurgling. The chamfered outlet spout also fits in narrow threaded necks and allows easy and clean dosing.

Broad Product Program

FLUXX®-Dispensing Taps are available for all common industrial containers with standardized thread sizes ranging from DIN 45 to DIN 71 and drums with $\frac{3}{4}$ " or 2" threads.

Patented Venting System

The outstanding flow properties are based on the patented ventilation system. Thanks to this FLUXX®-Dispensing Taps AH 23 have a high flow rate of >5 L/min.

No Leaking

FLUXX®-Dispensing Taps are leakproof even with aggressive chemical compounds and strongly creeping fluids.

Declaration of Conformity

All components used in the production process are uncritically in regards to EG food regulatory guidelines 2002/72 and the German „Lebensmittel-und Futtermittel Gesetzbuch (LFGB)“.

AH 23

Example

Dispensing Tap

- **Fast**, clean dispensing without gurgling
- **Available** for all common thread sizes
- **Outlet** spout fits into DIN 28 bottle necks and allows easy dosing even in smaller containers
- **Chamfered** tip for clean dispensing
- **High** flow rate of more than 5 L/min
- **High** chemical resistance
- **All** components are physiologically harmless

Dispensing of

- Chemicals
- Cleaners
- Disinfectants
- Liquid food
- Lubricants
- Water
