These dimmers employ the latest micro-controller based circuitry to provide electronic soft-start and overload protection. They are suitable for use with good quality electronic or wire-wound transformers. Can also be used with good quality halogen lamps incorporating GU10 bases. Please check with lamp manufacturer to determine suitability.

NOT SUITABLE FOR FLUORESCENT LOADS

Conform to latest standards BS EN 60669-2-1. All intelligent dimmers have a combined push-on/push-off switch and rotary dimmer control, and are suitable for one or two-way switching. Only one dimmer can be used in a two way switching circuit.

NOTE

Grid frontplates include an integral grid mounting frame. See page xx for full range of Grid Functional modules.

*Available with the option of either a white or black plastic trim. Add suffix 'W' or 'B' to the part number when ordering, e.g.

MHFPxxxBSSW = Brushed Stainless Steel finish with a white trim.

NB: It is recommended to match the trim colour to the functional module selected

**Metal finishes available November 2017
