Top Features

- Variable compartments due to removable separation walls allow for perfect order.
- High-grade refillable FixTainer.
- Combination of two material components for more performance.
- Secure functions for solid (expansion) and hollow and panel building materials

The advantages / Product description

fischer FixTainer - with the strong and smart duo

Advantages

- Two component materials for top load values and intelligent functioning depending on the substrate.
- The short plug length ensures fast fixing without deep drilling.
- The serrated anti-rotation feature prevents rotation in the drill hole during installation.
- Great feedback (feel-good factor) of the plug. You can feel exactly when the plug is installed perfectly.
- The narrow plug rim prevents slipping into the drill hole.

The fischer FixTainer is a practical and universally useful box with plugs, screws and hooks for the most frequent applications and building materials. The interaction of the ideally matched components always guarantees the choice of a secure fixing solution. Thanks to the transparent lid and the compartments, the contents can be

viewed at a glance. This saves time and guarantees that the suitable fixing element is selected. The description of the plug function and an overview of the appropriate building materials on the bottom of the FixTainers ensures extra security for the installation. The fischer FixTainer is easy to transport thanks to the large handle. Several boxes can be connected together with the click system. The removable partitions allow a variable and needs-based division.

Application and approval

Applications

- TV consoles
- Lighting
- Shelves
- Mirror cabinets
- Letter boxes
- Pictures
- Fixing blinds
- Curtain rails
- Wash basin fixings
- Plumbing and heating fixings
- Bath and toilet installations
- Wall cabinets
- Range hood

Building materials

- Concrete
- Solid brick
- Solid sand-lime brick
- Aerated concrete
- Vertically perforated brick
- Perforated sand-lime brick
- Plasterboard
- Gypsum plasterboard and gypsum fibreboards
- Hollow blocks made from lightweight concrete
- Cavity floor slabs made from bricks and concrete or similar
- Natural stone

- Chipboard
- Solid panel made from gypsum
- Solid brick made from lightweight concrete

You can find detailed information on building materials in the registration document.

Assembly instruction

Functionality

- The DuoPower is suitable for pre-positioned and push-through installation.
- The duo of two different materials and its multiple functional abilities (expanding, folding, and knotting) extend the range of applications to additional materials with top loads.
- The required screw length is given by the plug length + fixture thickness + 1x the screw diameter.
- Suitable for wood and chipboard screws, as well as stud screws.
- In the case of fixing boards, the threadless part of the screw must not be longer than the fixture.

Technical data

Contents	120 x DuoPower 6 x 30, 60 x DuoPower 8 x 40, 30 x DuoPower 10 x 50
